

Brute XD Lock Instructions Supplement

The **New Brute XD** has the added extra duty lock cover. The new security cover needs to be removed in order to change the lock combination.

Step 1. Remove the lock cover by pulling the foam back and exposing the two 7/16" hex bolts. Use a 7/16" socket to remove the bolts and cover.

Step 2. When the security cover is removed it allows access to the the lock and "L" tab.

Step 3. Follow the Lock Instructions supplied with your new Brute XD to change your combination.

Step 4. Make sure your new combination is working properly and re-install the lock cover.
