HAYMAN

QUALITY BUILT SAFES

Over 40 Years Strong...

Strength, Style and Reliability,

These are the words used to describe the Everglades Series of Gun Safes from HAYMAN Safe Co. Built using state of the art processes, the Everglades Series will give you peace of mind knowing your firearms are protected.

We begin with a continuous sheet of 12 gauge steel and then bend, fold and shape it to give us a body much stronger than welded sheet metal.

Our door has drill resistive triple hard plate lock mounting and spring loaded re lockers. 1 ¼" dia. Bolts lock the door on all 4 sides with active bolts top, bottom and the leading edge.

Dead bolts lock the hinge side to give total protection...

what else would you expect from Hayman?

In addition to outstanding burglar resistance, the Everglades Series Gun Safe offers 1hr Certified Fire Protection. The body has 1" of fire board in two layers and the door has three layers or 1 ½" of protection.

Our versatile interior allows for the storage of long guns on one side and shelf storage on the other or it can easily be changed so you can store long guns on both sides. The Everglades is designed to truly meet your personal needs.

Add all this up and you have one of the best made Gun Safes available at a price you can afford.

- UL RSC Labeled burglary protection
- Certified 1hr fire rated @ 1200 degrees
- Fire activated expandable door seal
- 3 sizes to choose from
- Bolt down holes with anchors provided
- 3 and 5 Spoke handles
- Dehumidifier access hole
- Powder coated finish gives a hard durable finish for years of good looks
