

Tidel D3 Storage Vault

The Tidel D3 smart safe provides retailers a convenient way to securely deposit cash throughout their business day. The Tidel D3 provides increased security, greater accountability, and reduced risk for a store's cash environment. The Tidel D3 removes the manual burden of recording and reconciling cash deposits, allowing store personnel to focus on more productive tasks.

The most recent addition to the Tidel D3 family is the offering of a separate manual storage vault. The storage vault allows store personnel to perform manual currency drops, and later enable access to those drops, without providing access to the note cassettes. The vault can also be used to store items such as paper rolls or bags of coin.

The Tidel D3 offers an expansive software suite that provides a complete cash management application with full accountability and auditability of all system activity. The Tidel D3 can easily connect to a store's network - via Ethernet or cellular - enabling full visibility to all system transactions from a remote location. The Tidel D3 with Storage Vault offers an easy to use 7-inch color console and comes equipped with one single note validator and supports one standard (1,200 note) cassette.

Serviceability on the Tidel D3 is extremely efficient and cost-effective. The main CPU board and power supply are easily accessible via the system console, making service calls faster, more secure, and cost efficient. The Tidel D3 note validator can be easily removed to clear a note jam, without the need for an expensive service call.

Tidel D3

Storage Vault

Specifications

Hardware Features

- 7" color console
- Power supply and main CPU board accessible via the console
- One note validator – single note feed
- Support for one standard (1,200 note) cassette
- Support for single coin acceptor module
- Separate manual drop vault
- Removable note validator head
- Personal Identification Number (PIN) and/or iButton allows managed access to functions, reports, and instant access
