

# **MOTOTRBO**<sup>TM</sup> **CONNECT PLUS**

#### **EXCEPTIONAL CAPACITY AND COVERAGE**

MOTOTRBO Connect Plus is a digital trunked two-way radio system to suit the largest organizations. Built around a traditional decentralized architecture, it offers compatibility with all generations of MOTOTRBO radios.

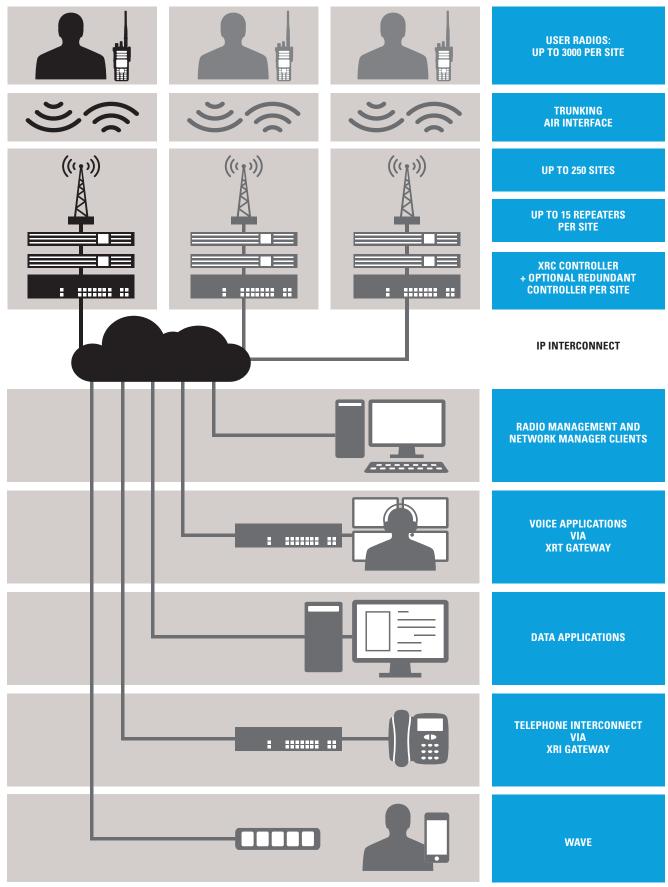

When you have exceptional requirements – an enormous organization, a vast coverage area, a large fleet of first-generation radios - then you need the exceptional capabilities of MOTOTRBO Connect Plus. With a decentralized multi-site architecture, a broad set of productivity-enhancing features, and close integration with the WAVE solution, Connect Plus delivers a complete solution. Connect Plus is a trunked radio solution with a dedicated control control and controller at every site. A mature solution with many years of field operation, Connect Plus is highly reliable, with multiple layers of resiliency and redundancy. It also offers high security, with user authentication and encryption options.

The system is scalable to 250 sites, with up to 15 voice and data repeaters per site (up to 420 repeaters or 770 traffic channels per system).

## **MOTOTRBO SYSTEM TYPES**

CONVENTIONAL	IP SITE CONNECT	CAPACITY PLUS	CONNECT PLUS	CAPACITY MAX
NON - TR	UNKING		TRUNKING	
BASELINE CAPACITY AND COVERAGE	ENHANCED COVERAGE	COST-EFFECTIVE COVERAGE AND CAPACITY	COVERAGE AND CAPACITY	CAPACITY, COVERAGE AND CONTROL
SINGLE SITE	UP TO 15 SITES	UP TO 15 SITES	UP TO 250 SITES	UP TO 250 SITES
UP TO 200 USERS	UP TO 200 USERS	UP TO 1600 USERS PER SITE	UP TO 3000 USERS PER SITE	UP TO 3000 USERS PER SITE

## **MOTOTRBO CONNECT PLUS SCHEMATIC**

# **EXCEPTIONAL CAPACITY AND COVERAGE**

## **EXCEPTIONAL SCALE**

Connect Plus can be scaled to deliver an enormous system: up to 250 sites with up to 3000 users per site. Sites are interconnected with a standard IP network, allowing workers in different locations, states or even countries to collaborate efficiently. Each site deployment consists of a controller and up to 15 voice and data repeaters.

### **MATURE SOLUTION**

Customers and partners have been deploying MOTOTRBO Connect Plus systems since 2009, giving you great confidence in the performance and reliability of the solution. We continue to develop additional features and capabilities in response to customer demand.

#### WIDE COMPATIBILITY

As a mature MOTOTRBO system, Connect Plus retains compatibility with the full portfolio of trunked radios, including the original MOTOTRBO XPR 6000 and XPR 4000 Series units. If you already have a large fleet of older radios, Connect Plus is the perfect system to support their continued operation.

#### **RADIO MANAGEMENT**

Keeping your radio fleet up to date is an important part of operations. Radio Management makes that easy by centralizing codeplug administration, and by enabling remote management and software updates. With a flexible configuration and intuitive user interface, Radio Management helps you keep your organization operating efficiently.

## **RADIO COMPATIBILITY**
