RSR

LM Guide Miniature Types Model RSR

Point of Selection	A 1-10
Point of Design	⊠1-436
Options	⊠1-459
Model No.	⊠1-524
Precautions on Use	⊠1-530
Accessories for Lubrication	⊠24-1
Mounting Procedure and Maintenance	₿1-89
Equivalent moment factor	⊠1-43
Rated Loads in All Directions	⊠1-58
Equivalent factor in each direction	⊠1-60
Radial Clearance	⊠1-71
Accuracy Standards	⊠1-82
Shoulder Height of the Mounting Base and the Corner Radius	⊠1-451
Permissible Error of the Mounting Surface	⊠1-453
Flatness of the Mounting Surface	⊠1-454
Dimensions of Each Model with an Option Attached	A1-472

Structure and Features

With models RSR and RSR-W, balls roll in two rows of raceways precision-ground on an LM rail and an LM block, and endplates incorporated in the LM block allow the balls to circulate.

Since balls circulate in a compact structure, the LM Block is able to provide infinite straight motion and thus infinite stroke.

The LM block is designed to have a shape with high rigidity in a limited space, and in combination with large-diameter balls, demonstrates high rigidity in all directions.

[Ultra Compact]

The absence of cage displacement, a problem that cross-roller guides and types of ball slides with finite stroke tend to cause, make these models highly reliable LM systems.

[Capable of Receiving Loads in All Directions]

These models are capable of receiving loads in all directions, and a single-rail guide can adequately operate under a small moment load. Model RSR-W, in particular, has a greater number of effective balls and a broader LM rail to increase its rigidity against a moment. Thus, it achieves a more compact structure and more durable straight motion than a pair of linear bushes in parallel use.

[Stainless Steel Type also Available]

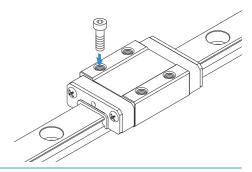

A special type where LM block, LM rail and balls are made of stainless steel is also available.

Types and Features

Model RSR-M

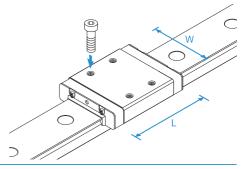

Specification Table⇒▲1-254

Models RSR-WM/WVM

These models have greater overall LM block lengths (L), broader widths (W) and greater rated loads and permissible moments than standard types.

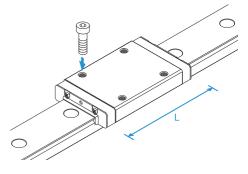

Specification Table⇒▲1-254

Model RSR-N

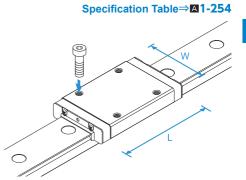

It has a longer overall LM block length (L) and a greater rated load than standard types.

Specification Table⇒▲1-254

Model RSR-WN

It has a longer overall LM block length (L), a greater rated load than standard types. Achieves the greatest load capacity among the miniature type LM Guide models.

LM Guide

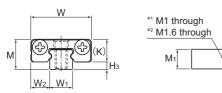

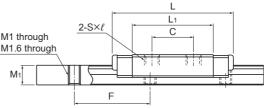

Accuracy of the Mounting Surface

Model RSR uses Gothic arch grooves in the ball raceways. When two rails of RSR are used in parallel, any error in accuracy of the mounting surface may increase rolling resistance and negatively affect the smooth motion of the guide. For specific accuracy of the mounting surface, see [Flatness of the Mounting Surface] on **II-454**.

RSR 14WVM	15	50	50	35	18	M4×4.5	34.3	6	11.5	3	4	_	PB107	3.5

Note) Since stainless steel is used in the LM block, LM rail and balls, these models are highly resistant to corrosion and environment. Models RSR2 and 3 do not have an oil hole. When lubricating them, apply a lubricant directly to the LM rail raceways. No contamination protection seal for RSR2N/2VMN/3M/3N.

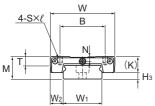

Model number coding 2 RSR3 M UU **C1** +80L Ρ Π М Model number Contamination LM rail length Stainless Symbol for protection (in mm) steel No. of rails used accessory symbol (*1) LM rail on the same plane (*4) No. of LM blocks Radial clearance symbol (*2) Accuracy symbol (*3) used on the same rail Normal (No symbol) Normal grade (No Symbol)/Precision grade (P) Light preload (C1) (*1) See contamination protection accessory on A1-496. (*2) See A1-71. (*3) See A1-82. (*4) See A1-13. Note) This model number indicates that a single-rail unit constitutes one set. (i.e., required number of sets when 2 rails are used in parallel is 2 at a minimum.)

Max length	200	200	220	480	1800			

Note1) The maximum length varies with accuracy grades. Contact THK for details. Note2) The LM rail mounting hole of model RSR3 is an M1.6 through hole.

Stopper

In model RSR/RSR-W, the balls fall out if the LM block comes off the LM rail.

For this reason, they are delivered with a stopper fitted to prevent the LM block coming off the rail. If you remove the stopper when using the product, take care to ensure that overrun does not occur.

Table3 Model RSR/RSR-W stopper (C type) specification table

			Unit: mm
Model No.	А	В	С
14W	33.8	7	13

Note) Models RSR2 and RSR3 use O-rings.
