

## Please send all samples directly to Logan Labs for testing

Detailed instructions will be emailed to you following purchase.

## Soil Test Packages

### **Saturated Paste Test \$30**

This test should be taken for soilless media following the Complete Soil Package test. It is also helpful for mid-season monitoring. The saturated paste package includes pH, soluble salts, chloride, bicarbonate, water soluble phosphorous, calcium, magnesium, potassium, sodium, boron, iron, copper, zinc, aluminum, sulfur, and manganese.

### **Complete Soil Package \$55**

Take this test if you are growing food for resale, cannabis, hemp, soilless media, or are trying to pinpoint a problem. Your analysis will provide you with the Standard Soil Analysis, Saturated Paste Analysis, and available nitrate and ammonium.

### **Complete Soil Package with Extras \$60**

This includes the Complete Soil Package plus Cobalt, Molybdenum, Selenium, Silicon, Conductivity, and ENR.

## Water Test Packages

### **Irrigation Water Monitoring \$35**

The irrigation water monitoring package includes: pH, soluble salts, chloride, bicarbonate, carbonate, alkalinity, hardness, SAR, calcium, magnesium, potassium, sodium, iron, boron and sulfate.

### **Irrigation Water Suitability \$42**

The irrigation water suitability package includes: irrigation water monitoring package, plus nitrate, adjusted SAR, pHc, Phosphorus.

## Plant tissue packages

### **Complete Plant Tissue Package \$40**

This test is helpful for monitoring deficiencies during growing season. The plant tissue package includes: nitrogen, phosphorous, potassium, calcium, magnesium, sulfur, boron, iron, sodium, manganese, copper, and zinc.

## Consultation / Interpretation of Results

**Consultations are \$45. If you purchase a test and consultation, your consultation will be \$35.**

**We will need, at the least, a complete soil test to be able to analyze your results.**

All our consultations are done by a member of our expert team and tailored to your specific situation and needs. We do not use software to define your results. We look at your growing situation as a whole so we can supply you with a complete picture and offer comprehensive guidance on next steps. Your consultation will include amendment recommendations
