THE SMILING CIRCULATOR EVOTRON

APPLICATIONS

The new DAB energy class "A" domestic circulating pumps have been designed and developed to provide a superior solution in all fields of application.

The EVOTRON circulators are designed for use within heating and air conditioning systems. They are also suited for the circulation of domestic hot water, solar and geothermal systems.

RANGE

A very comprehensive and versatile range, testimony to the continued commitment that DAB make to supplying products and solutions able to meet the diverse requirements of the market.

EVOTRON makes the best choice when replacing your circulator.

DESIGN

An ergonomic layout for interaction and management of the various operational functions the Evotron pump offers to the user.

Luminous user interface tilted at 45° to help aid reading and understanding of the settings needed in all conditions.

IT'S TIME TO CHANGE

EVOTRON

IT'S TIME TO SMILE

ENERGY SAVING

EVOTRON is the new variable speed circulator introduced by DAB, fully in line with the new European directive ErP 2009/125/EC (previously EuP) .

It is also supplied as standard with an insulation housing kit which adds significantly reducing in heat dispersion, this guaranteeing further savings.

EVOTRON consumes up to 70% less energy than a conventional Circulating pump, giving you a swift return of your investment.

NIGHT-TIME FUNCTION

EVOTRON is equipped with a "smart sleep" function, which guarantees improved and optimized energy consumption overnight.

EASY AND IMMEDIATE

EVOTRON circulators are supplied as standard with a special connector that enables simple and quick electrical Connections on installation, giving increased flexibility in more problematic installation sites.

Evotron is simple to set up and thanks to its intuitive interface gives you Immediate operational feed-back. This ensures constant control and efficiency of all operating parameters at all time
