

ELECTRONIC WET ROTOR CIRCULATORS EVOTRON

Technical Sheet

EVOTRON

ELECTRONIC CIRCULATORS FOR HEATING AND AIR CONDITIONING SYSTEMS

compliant with the 2013 and 2015
european directive ErP 2009/125/EC
(ex EuP)

GENERAL DATA

Applications

Low power consumption electronic pump for circulation of water in domestic central heating and air conditioning systems of the closed circuit pressurized type or open circuit type.

Advantages

Thanks to the advanced technology employed, the **permanent magnet synchronous motor**, and the **frequency converter**, the new range of **EVOTRON** circulators ensures high efficiency in all applications, bringing appreciable benefits in terms of energy saving. That's why the entire series of **EVOTRON** circulators is included in energy efficiency class A. The circulator features an electronic device that detects the changes demanded by the heating system and automatically adapts circulator performance accordingly, always ensuring optimal efficiency and minimum energy consumption.

Straightforward operation and an easy-to-ready control panel with display that shows the selected setting at each moment of operation **EVOTRON** circulators can function in three different control modes:

- Proportional pressure  3 curves
- Constant pressure  2 curves
- Constant speed  3 curves

Improved and optimized energy consumption overnight (SMART SLEEP Function) 

Supplied with a special connector that enables simple and quick electrical Connections on installation.

Supplied with an insulation housing kit which adds significantly reducing in heat dispersion.

Construction features

Enbloc body composed of hydraulic section in cast iron and wet rotor motor. Motor casing in die cast aluminium. Impeller in technopolymer. Motor shaft in ceramic held in graphite bearings lubricated by the pumping medium. Rotor protective jacket, stator jacket, and closing flange in stainless steel. Ceramic thrust ring, ethylene-propylene seal rings and brass air breather plug. The two-pole synchronous wet-rotor motor driven by frequency converter and does not require any form of overload protection.

Operating range: from 0,4 to 4,2 m³/h with head of up to a 8 mt

Liquid temperature range: from -10°C a +110°C

Maximum working pressure: 10 bar (1000 kPa)

Protection rating: IP 44

Insulation class: F

Installation: with HORIZONTAL MOTOR SHAFT

Standard voltage input: single-phase 1 x 230 V / 50 / 60 Hz

Liquid quality requirements: clean, free of solids and mineral oils, non-viscous, chemically neutral and approximating the properties of water (max. glycol contents 30%)

Special versions on request : alternative voltages and/or frequencies

EVOTRON SAN

ELECTRONIC CIRCULATORS FOR DOMESTIC HOT WATER SYSTEMS

compliant with the 2013 and 2015
european directive ErP 2009/125/EC
(ex EuP)

GENERAL DATA

Applications

Low power consumption electronic pump for hot water circulation in domestic central heating and air conditioning systems of the closed circuit pressurized type or open circuit type.

Advantages

Thanks to the advanced technology employed, the **permanent magnet synchronous motor**, and the **frequency converter**, the new range of **EVOTRON** circulators ensures high efficiency in all applications, bringing appreciable benefits in terms of energy saving. That's why the entire series of **EVOTRON** circulators is included in energy efficiency class A. The circulator features an electronic device that detects the changes demanded by the heating system and automatically adapts circulator performance accordingly, always ensuring optimal efficiency and minimum energy consumption.

Straightforward operation and an easy-to-ready control panel with display that shows the selected setting at each moment of operation **EVOTRON** circulators can function in three different control modes:

- Proportional pressure  3 curves
- Constant pressure  2 curves
- Constant speed  3 curves

Improved and optimized energy consumption overnight (SMART SLEEP Function) 

Supplied with a special connector that enables simple and quick electrical Connections on installation.

Supplied with an insulation housing kit which adds significantly reducing in heat dispersion.

Construction features

Enbloc body composed of hydraulic section in bronze and wet rotor motor. Motor casing in die cast aluminium. Impeller in technopolymer. Motor shaft in ceramic held in graphite bearings lubricated by the pumping medium. Rotor protective jacket, stator jacket, and closing flange in stainless steel. Ceramic thrust ring, silicone seal rings. The two-pole synchronous wet-rotor motor driven by frequency converter and does not require any form of overload protection.

Operating range: from 0,4 to 4,2 m³/h with head of up to a 8 mt

Liquid temperature range: from -10°C a +110°C

Maximum working pressure: 10 bar (1000 kPa)

Protection rating: IP 44

Insulation class: F

Installation: with HORIZONTAL MOTOR SHAFT

Standard voltage input: single-phase 1 x 230 V / 50 / 60 Hz

Liquid quality requirements: clean, free of solids and mineral oils, non-viscous, chemically neutral and approximating the properties of water

Special versions on request : alternative voltages and/or frequencies

EVOTRON SOL

ELECTRONIC CIRCULATORS FOR SOLAR PANEL AND GEOTHERMAL HEATING SYSTEMS

compliant with the 2013 and 2015
european directive ErP 2009/125/EC
(ex EuP)

GENERAL DATA

Applications

Low power consumption electronic pump for circulation of fluid media in solar panel powered heating systems.
EVOTRON SOL wet rotor circulators can function perfectly also with high glycol concentrations (up to 60%).

Advantages

Thanks to the advanced technology employed, the **permanent magnet synchronous motor**, and the **frequency converter**, the new range of **EVOTRON** circulators ensures high efficiency in all applications, bringing appreciable benefits in terms of energy saving. That's why the entire series of **EVOTRON** circulators is included in energy efficiency class A. The circulator features an electronic device that detects the changes demanded by the heating system and automatically adapts circulator performance accordingly, always ensuring optimal efficiency and minimum energy consumption.

Straightforward operation and an easy-to-ready control panel with display that shows the selected setting at each moment of operation
EVOTRON circulators can function in three different control modes:

- Proportional pressure  3 curves
- Constant pressure  2 curves
- Constant speed  3 curves

Improved and optimized energy consumption overnight (SMART SLEEP Function) 

Supplied with a special connector that enables simple and quick electrical Connections on installation.

Supplied with an insulation housing kit which adds significantly reducing in heat dispersion.

Construction features

Enbloc body composed of hydraulic section in cast iron and wet rotor motor. Special electrophoresis coating of the pump body to ensure resistance to glycol attack. Motor casing in die cast aluminium. Rotor in technopolymer, motor shaft in ceramic held in graphite bearings lubricated by the pumping medium. Rotor protective jacket, stator jacket, and closing flange in stainless steel. Ceramic thrust ring and silicone seals. The two-pole synchronous wet-rotor motor driven by frequency converter and does not require any form of overload protection.

Operating range: from 0,4 to 2,6 m³/h with head of up to a 8 mt

Liquid temperature range: from -10°C a +110°C (temperature peaks up to 140°C)

Maximum working pressure: 10 bar (1000 kPa)

Protection rating: IP 44

Insulation class: F

Installation: with HORIZONTAL MOTOR SHAFT

Standard voltage input: single-phase 1 x 230 V / 50 / 60 Hz

Liquid quality requirements: clean, free of solids and mineral oils, non-viscous, chemically neutral and approximating the properties of water (max. glycol contents 60%)

Special versions on request : alternative voltages and/or frequencies
