PRODUCT HIGHLIGHTS

With **variously adjustable LED colours** and **individual motifs on the platform**, the lift integrates harmoniously into its surroundings: Attractive eye-catcher instead of grey necessity - mobility from ASCENDOR is that beautiful!

In the event of a malfunction, a **colour display** provides information about the cause and possible remedies. In this way, 80% of all maintenance cases can be avoided. The display also provides information on the current operating status at a glance.

 An **automatic speech output** ensures more comprehensibility.

THERMALLY INSULATED DOOR

On request, a door can be integrated airtight into the masonry. Due to the **excellent thermal insulation**, the lift is thermally separated from the building.
