1 Attach Base

Attach lower mounting plate (I) to the upright (A) with holes using the included allen screws and washers (J). Orient the lower mounting plate so that it faces the middle of the aquarium stand.

2 Adjustable Mounting Plate w/Knob

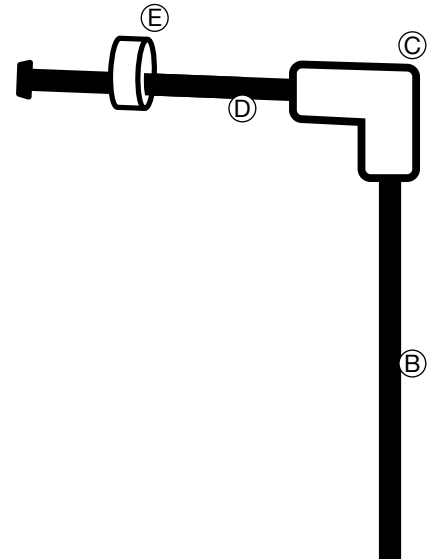

After the upright is installed, place the adjustable mounting plate w/knob (F) as close to the top of the stand as possible. Secure with the included wood screws and tighten the knob.

3 Assemble Hanger

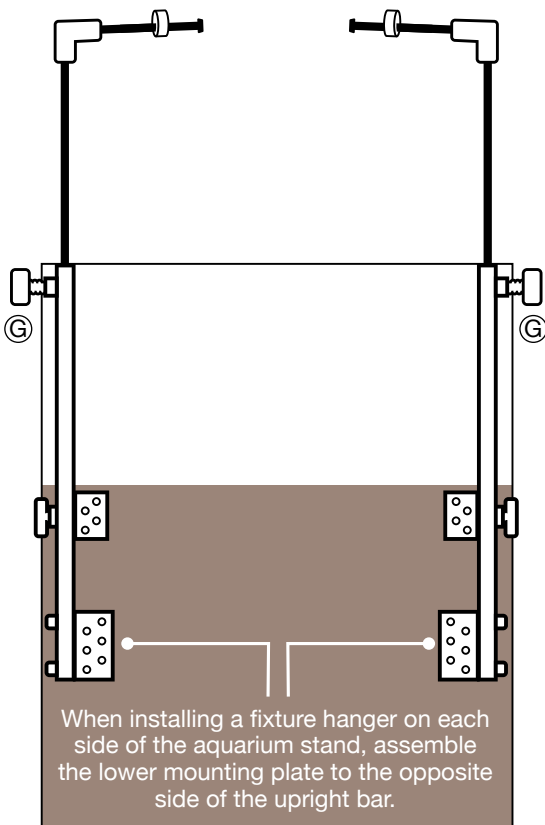

Slide the stop collar (E) onto the horizontal bar (D).

Thread the horizontal bar (D) and adjustable upright bar (B) into the 90° elbow (C).

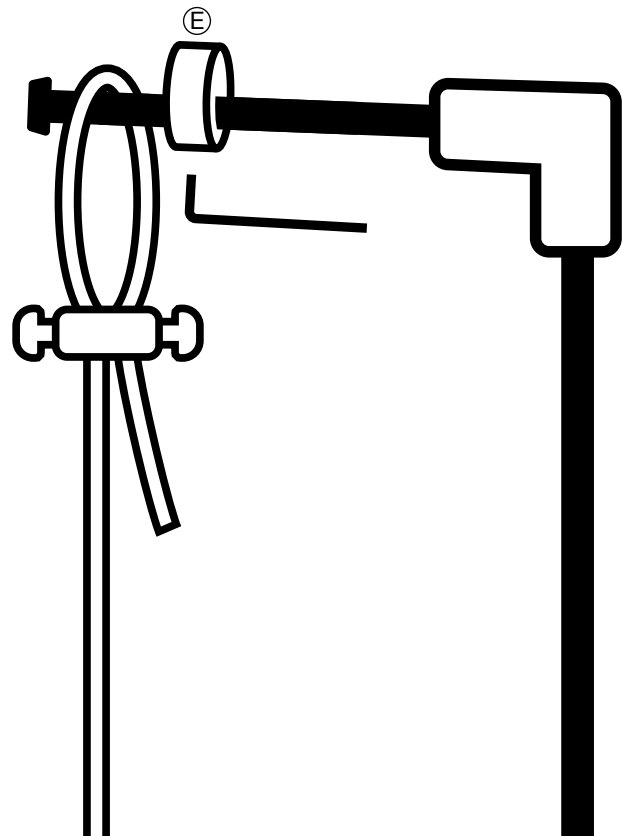

4 Attach Upright Bar to Base

Slide the assembled upright bar into the base and secure it at the desired height with the hand knob (G).

5 Secure Stop Collar

Position the stop collar (E) so that it will prevent the fixture suspension cable from sliding on the horizontal bar. Secure the stop collar in place using allen wrench.
