

POINT-OF-ENTRY SMART WATER FILTER SYSTEM

It is a well-known fact that people should drink eight glasses of water a day to help maintain a healthy lifestyle. With a Crystal Quest SMART Whole House Water Filters you get delicious, refreshing, safe, top-quality drinking water. Our filters are engineered for maximum filtration and maximum performance with minimum maintenance.

Enjoy filtered water 24 hours a day. Installs easily. Plumbs directly into your cold water line for a continuous water supply.

Coconut Shell GAC Catalytic GAC ERA 9500 ERA 6500 Ion Exchange Resin White Ceramic Balls Tourmaline Balls

CQE-WH-01120

CQE-WH-01121

FEATURES

- Great tasting, healthier water for drinking and cooking
- Crystal clear ice cubes
- Flavorful coffee, tea, mixes, and meals
- Ideal for baby formula, pasta, and soups
- Great for pet and plant water, aquariums
- Unlimited clean water supply to your home
- Easy to use and clean
- 5-10 year filtration life span* based on consumption and water condition

SPECIFICATIONS

Home Water Usage	1-3 Bathrooms	2-4 Bathrooms
Filter Media Volume	1.5 + cubic feet	2.0 + cubic feet
Capacity (gallons)	1,000,000	1,500,000
Service Flow (GPM)	9-11	10-13
Tank Dimensions	10" x 54"	12" x 52"
Material	Stainless Steel or Fiberglass	Stainless Steel or Fiberglass
Backwash	Automatic	Automatic

ADD-ONS

- Ultraviolet (UV)
- Flood prevention valve
- Ozonator
- Power Stabilizer
- Leak Protector
- Additional filtration can be added if required. Examples: fluoride, arsenic, iron, etc

WATER TRAVELS THROUGH 10 STAGES OF FILTRATION

Stage 1: Water flows through a 20" 5-micron pleated sediment filter cartridge that removes sediment, silt, sand and dirt. Also extends the life of water filters and prevents damage to control valves or pumps.

Stages 2 and 3: Includes 2 types of coconut shell Granulated Activated Carbons (Standard & Catalytic GAC) addressing chlorine, chloramine, & inorganic products such as herbicides, pesticides, petroleum/pharmaceutical, industrial solvents, THM's, PCB's, MTB's, benzene and other cancer related contaminants.

Stages 4 and 5: Crystal Quest® Eagle Redox Alloy 6500 and 9500 (oxidation/reduction process) is then infused into the blend reducing contaminants such as heavy metals, i.e. lead, mercury, aluminum, chlorine, chloramine, chromium.

Stage 6: Ion exchange resin, reducing heavy metals such as lead, copper, aluminum, and water hardness.

Stages 7 and 8: White ceramic and Tourmaline Balls together offer adsorption for impurities and heavy metals, while aiding in human metabolism and natural healing. They also increase in the absorption of water to aid in nourishment.

Stage 9: Water travels through a bed of quartz. It provides backwashing support and improves the taste of your water.

Stage 10: Water flows through a 20" 5-micron solid carbon cartridge for removing volatile organic carbon compounds (VOC's), insecticides, pesticides and industrial solvents and acts as a polisher for taste and odor.

*All filters and media have a limited service life and must be replaced at regular intervals to maintain proper performance. This can vary with water conditions and usage. Changes in taste, odor, and flow of the water being filtered indicate that cartridges should be replaced.

Disclaimer: Contaminants mentioned may not be present in your water.

This product is manufactured using: Ceramic balls that meet Standards 61/42 WQA Seal Certification; GAC which meets Standard ANSI 42 Certification; Eagle Redox Alloy® which meets ANSI Standards 61/42 Certification; and pre and post 1-micron filter pads which are from ISO 9001 approved manufacturers.
