Master Pursuit

By grower's choice

500W CMH/CDM GROW LIGHT SYSTEM

A new milestone in CMH technology, the Master Pursuit 500w CMH all-in-one fixture is a must-have. With higher efficiency compared to traditional 315w lamps, the 65% increase of light energy is a more economical alternative with nearly the same output as two 315w CMH lamps used in the 630w CMH fixtures. Providing an average of 1000 umol/s of usable photon flux, the newly designed components and safety features guarantee a high-quality product. This next generation technology has increased performance and overall reliability for a lighting system you can count on.

Rated Main Voltage:	120V 208V 240V 277V
Input Current:	4.7A 2.7A 2.4A 2.1A
Input Frequency:	50/60 Hz
Power Factor:	>0.98
THD:	<10%
Required Lamp Voltage:	110V ~ 140V
Illumination Surface:	Indoor 4'x4' Green House 6'x6'
