USER MANUAL

We continue to be committed to provide you tools with competitive price.

"Save Half", "Half Price" or any other similar expressions used by us only represents an estimate of savings you might benefit from buying certain tools with us compared to the major top brands and does not necessarily mean to cover all categories of tools offered by us. You are kindly reminded to verify carefully when you are placing an order with us if you are actually saving half in comparison with the top major brands.

2. Product overview

This cast steel anvil is manufactured using high-quality casting techniques, providing blacksmiths and metalworkers with a sturdy and stable work surface. It is suitable for various processes such as forging, hammering,

shaping, and cutting metal materials. This product features excellent durability and impact resistance, bringing higher efficiency and accuracy to your metalworking tasks.

3. Product properties- 66lbs Anvil

3.1 Product Structure

1. Hardy hole : The Hardy hole hole on the anvil is used to insert other tools, and other tools can be firmly connected to the anvil for further processing.

2. Pritchel hole: The Pritchel hole can be punched out on the product with a chisel or other tools.

3. Horn: The horn are specially designed to help blacksmiths shape metal pieces into round or curved shapes.

3.2 parameter

- 1) Model: GZL66
- 2) Material: Casting 40# steel
- 3) Working Surface Hardness: 53 ± 4 HRC
- 4) Hardy hole size: 22×22 mm
- 5) Pritchel hole size: $\phi 16$ mm
- 6) N.W.: 30kg
- 7) G.W.: 33.3kg
- 8) Package Size: 470x230x235mm

4. Product properties- 22lbs Anvil

4.1 Product Structure

1. Hardy hole : The Hardy hole hole on the anvil is used to insert other tools, and other tools can be firmly connected to the anvil for

further processing.

2. Pritchel hole: The Pritchel hole can be punched out on the product with a chisel or other tools.

3. Horn: The horns are specially designed to help blacksmiths shape metal pieces into round or curved shapes.

4.2 parameter

1. Model: GZL22
2. Material: Casting 40# steel
3. Working Surface Hardness: $53 \pm 4\text{HRC}$
4. Hardy hole size: $16 \times 16\text{mm}$
5. Pritchel hole size: $\phi 16\text{mm}$
6. N.W.: 10kg
7. G.W.: 11.1kg
8. Package Size: $400 \times 145 \times 140\text{mm}$

5. Product properties- 9lbs Anvil

5.1 Product Structure

1. Mounting holes : There are 4 mounting holes on the bottom, which can be fixed to the platform with screws.

2. Horn: The horns are specially designed to help blacksmiths shape metal pieces into round or curved shapes.

5.2 parameter

1. Model: GZL9
2. Material: Casting 40# steel
3. Working Surface Hardness: $53 \pm 4\text{HRC}$
4. N.W.: 4kg
5. G.W.: 4.6kg
6. Package Size: $250 \times 120 \times 130\text{mm}$

6. User Guide

1. Place the anvil on a flat, sturdy base, ensuring it is securely installed and resistant to sliding.
2. Heat the metal material to be forged to an appropriate temperature.
3. Place the heated metal material on the anvil surface and use a hammer or other tools to strike, shape, or cut it.
4. Reheat and forge the metal material as needed until the desired shape and dimensions are achieved.
5. After using, allow the metal material to cool naturally to room temperature.

7. Maintenance

1. If you do not use this tool for a long time, please add anti-rust oil on the surface.
2. Store the anvil in a dry, well-ventilated area away from direct sunlight.
