

HALFAR

Best of Bags.

SUSTAIN ability

HALFAR.
PEOPLE, PRODUCT & NATURE.

We think about **quality** in a holistic way!

The company, the **environment** and people!

People

social criteria

Halfar System is a family-run company at heart. Perhaps this is because interactions with each other take special priority here – and not just in our Bielefeld location, but also with all the people we come into contact with during our daily work, from our customers via our partners and right up to our suppliers.

This is **SUSTAIN**ability!

You won't just find evidence of sustainability at Halfar in our products – for example in our bags made from organic cotton. Sustainability is above all to be found in our actions, in our processes and our convictions. Our initiatives in this field are wide-ranging. We are involved in environmental and climate protection, in people and in expedient processes – i.e. a balance between ecology, economy and social matters.

Product

economical criteria

We observe high ecological criteria and for this reason all our products are tested by independent institutes in order to prove and attest that all materials used in our bags are harmless. We also have a 3-year guarantee in case of deficient materials or processing. Because we always want to be better for our customers, we work in accordance with the quality standard DIN ISO 9001:2015.

Nature

ecological criteria

We are very aware that everything which we do as a company has an influence on the environment and the climate. Therefore, we commit ourselves to making our products and processes increasingly sustainable. For this reason, f. e. our work has been 100% CO₂-neutral since 2017; we also subsidise the use of public transportation, ensure a sustainable supply chain in accordance with the GOTS Standard for our organic cotton products, and work according to the Environmental Management Standard DIN ISO 14001:2015.

Today, for the **FUTURE!**

Whether a document, certificate or a prize: Halfar as a company has already received many awards – and much of this hasn't been for creative bags and products.

We have also been honoured for our commitment in other fields. We regard ourselves as a part of society, and actively shape our environment. Responsibility is a term which is of central importance for Halfar. Whether socially or ecologically: Halfar gets involved, frequently with their own ideas and personal commitment. For this reason, we are delighted to see this commitment acknowledged through awards.
