

Sustainability

At HALFAR®, you will find sustainability not only in our products – such as in our bags made from organic cotton. Sustainability also influences our activities, our processes and convictions. Our initiatives in this area are broadly diversified. For example, we are involved in environmental and climate protection, people and sensible processes. Hence, in a balance between ecological, economical and social actions.

Here are a few examples:

Product

- ✓ Our organic cotton products are produced according to the GOTS Standard.
- ✓ We continuously increase the share of PVC free articles to a significant extent.
- ✓ We guarantee that our products are in conformity with the law and that the materials used are safe, which is checked by independent accredited institutes. In this way, we guarantee that the legal standards of REACH and LFGB are observed.
- ✓ We give priority to durability and quality of our products and provide a 3 year guarantee for faultless materials and processing .

Environment

- ✓ Since 2017, the Halfar building in Bielefeld has been operated 100% CO₂-neutral.
- ✓ Our employees receive a grant for using JobBikes and public transportation.

People

- ✓ We promote and support healthy working for our employees.
- ✓ We offer a flexible work arrangement, for which we were honoured with the “Family-friendly award”.
