

Momentary Switches From VARILIGHT®

Thank you for purchasing a momentary push switch from VARILIGHT. Operation is simple – push to make the circuit (ideal for door chimes, etc). This switch is rated at 6A.

Fitting Your Momentary Switch

Read the instructions below carefully. Incorrect installation may damage the switch beyond repair. **In case of any doubt or difficulty consult a qualified electrician.**

1. Switch off at the mains, then remove the existing switch and disconnect the wiring from the terminals at the rear, taking note of the present wiring and the marking on the terminals. Where there are two or more wires together in the old switch, they must be kept together in the new one.
2. This product is only suitable for 1-way circuits. To connect the wiring correctly refer to the diagram below. Take care that no bare wires project out of the terminals. Keep wires together in a terminal if they were together in your old switch.
3. Switches having a metal front plate must be earthed by means of the earthing point provided.
4. Once installation is complete. Switch on the mains supply and begin using your switch.
