

# Lawson Hammock Underquilt

## For Use with Blue Ridge Camping Hammock

1

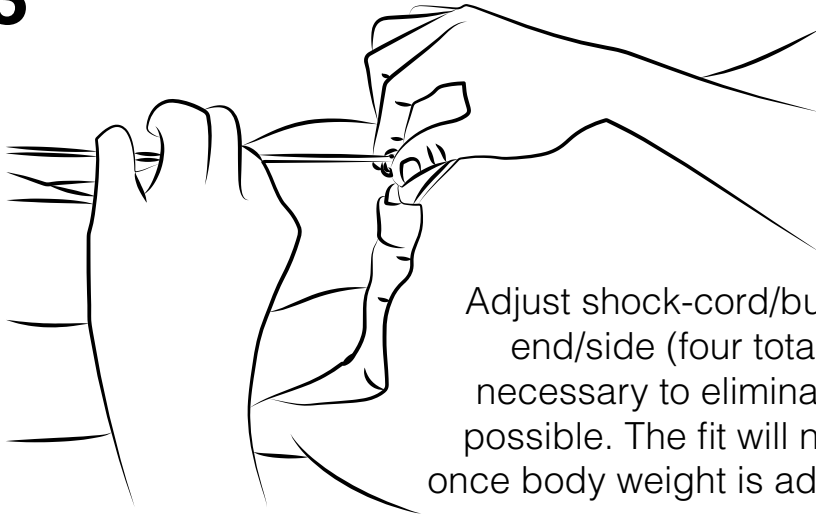

Hang hammock to your desired tension/height (for your safety we recommend no more than 18" off the ground).

2

Flip hammock over and slide webbing loop at one underquilt corner onto end of hammock spreader bar and repeat for all four corners. There are four loop options (including bungee which is first loop) at each corner to allow tension adjustment as necessary. Flip hammock back over to upright position.

3

Adjust shock-cord/bungee locks at each end/side (four total at each end) as necessary to eliminate as much gap as possible. The fit will naturally be snugger once body weight is added inside hammock.

4

Enjoy a warm night's sleep!

# For Use with Standard / Gathered end hammocks

1

Hang hammock to your desired tension/ height (for your safety we recommend no more than 18" off the ground).

2

Clip the end bungees onto the hammock / strap carabiner. Repeat on other side.

3

Place the hammock inside the quilt.

4

Adjust shock-cord/bungee locks at each end/side (four total at each end) as necessary to eliminate as much gap as possible. The fit will naturally be snugger once body weight is added inside hammock.

5

Sit in the hammock. Readjust cordlocks if necessary.

6

Enjoy a warm night's sleep!
