

# Lawson Hammock Underquilt

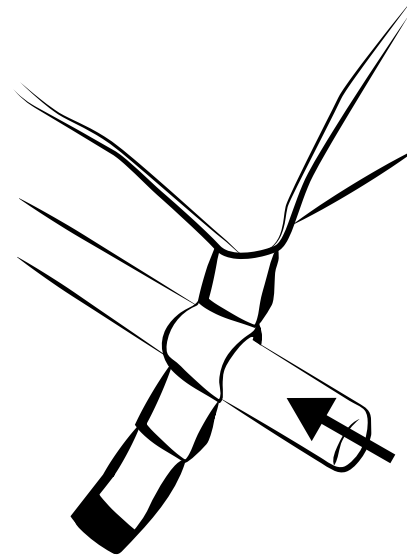

## For Use with Blue Ridge Camping Hammock

1

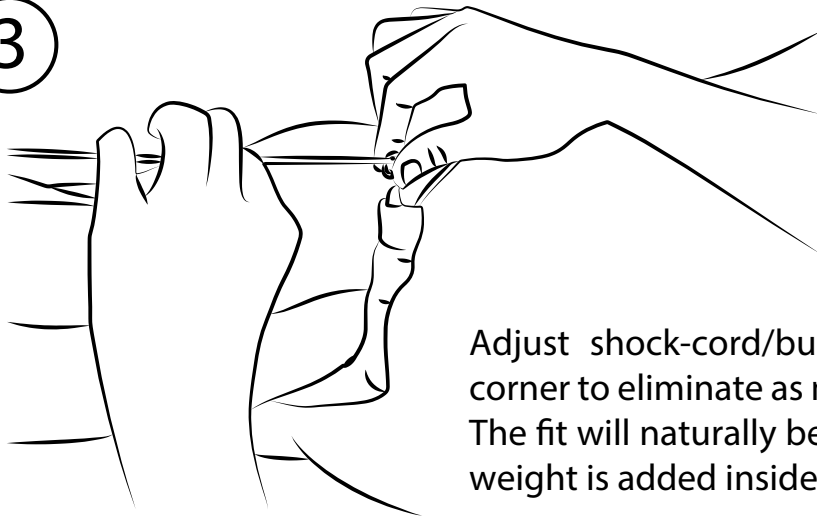

Hang hammock to your desired tension/height. For your safety, we recommend no more than 18" off the ground.

2

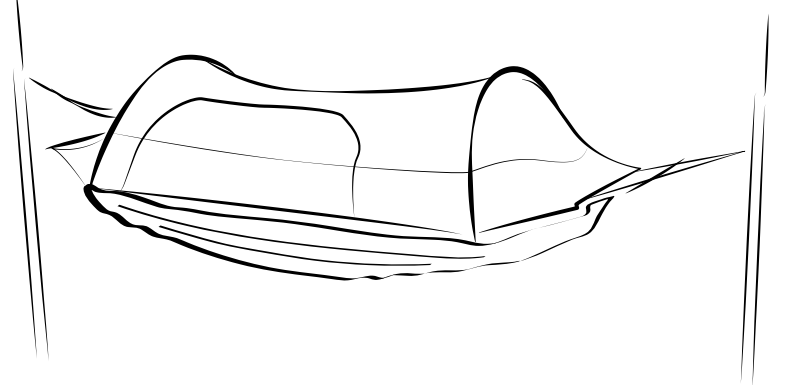

Flip hammock over and slide one elastic webbing loop onto end of hammock spreader bar. Repeat on all four corners. There are four elastic loop options at each corner to allow tension adjustment as necessary. Flip hammock back over to upright position.

3

Adjust shock-cord/bungee locks at each corner to eliminate as much gap as desired. The fit will naturally be snugger once body weight is added inside hammock.

4

Enjoy a warm night's sleep!

# For Use with Standard or Gathered End Hammocks

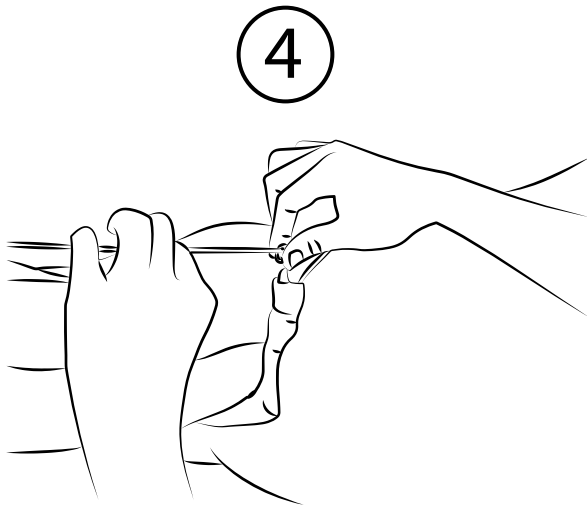

1  
Hang hammock to your desired tension/height. For your safety, we recommend no more than 18" off the ground.

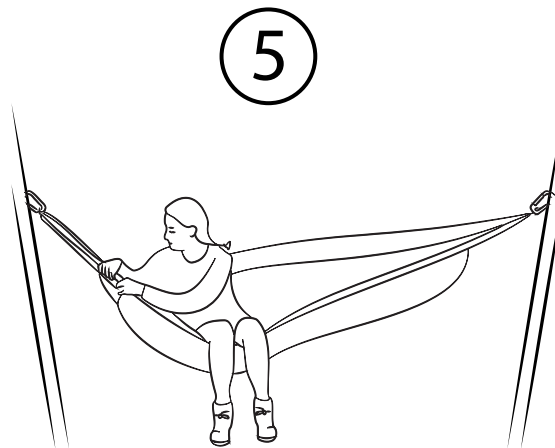

2  
Clip one of the elastic webbing loops through hammock carabiner. There are four elastic loop options at each corner to allow tension adjustment as necessary. Repeat on other side.

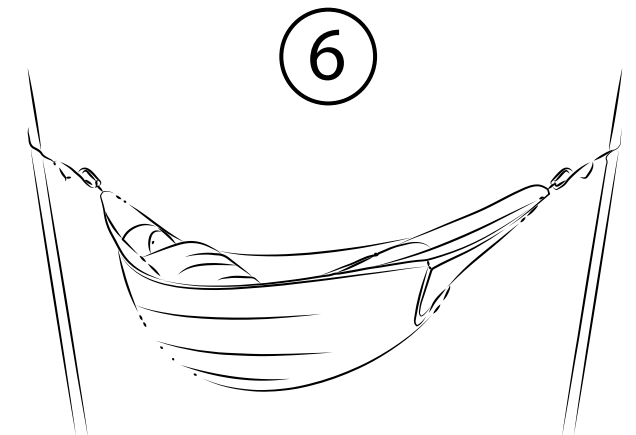

3  
Place the hammock inside the underquilt.

4  
Adjust shock-cord/bungee locks at each corner to eliminate as much gap as desired. The fit will naturally be snugger once body weight is added inside hammock.

5  
Sit in the hammock. Readjust cordlocks if necessary.

6  
Enjoy a warm night's sleep!
