

WHY TOOTHSHOWER

The American Dental Association states that toothbrushing is not enough for oral hygiene, as it can't remove debris and bacteria between your teeth. The ToothShower allows you to "clean between" by brushing and water flossing in the shower for a healthy smile.

Invented by a dental hygienist, after hearing her patients' hesitations around traditional string flossing, she invented the ToothShower to make oral care easy. The ToothShower is easily set-up using 3M Command™ Bath Strips, which keep it in place and removable for cleaning.

May be FSA eligible

FOUR ADDITIONAL ACCESSORIES
