**QUICK TIPS**

**REDUCING CELL PHONE EMF & RF EXPOSURE**

RF (Radio Frequency) affects us all, especially pregnant moms and children.

Use a corded landline as an alternative to your cell phone.

Using a head phone or the speaker on your smartphone while keeping your phone in your purse is a good rule of thumb. Remember your body absorbs more RF signals when at close proximity. So always keep a distance from any emitted RF devices from your body.

Never sleep beside your devices.

If your experiencing headaches the next morning, one of the reason could be your wireless devices right next to you.

Always place your smart phone on flight mode and turn off your WI-FI devices when not in use!

Purchasing any of Momz Halo apparel will shield 99.9% against non-ionized RF signals.
