Beautiful Polymer Art Ring Dish
By
Rbjewelz Burch

Collaboration with
Tiny Pandora
In this tutorial, I will show you how to make a beautiful ring dish using my favor polymer clay cane and a small glass dish.

This tutorial is written with the assumption that you have polymer clay caning experience.

I encourage you to read through the entire tutorial before you begin. You will get a better understanding of the flow of the project.

*MATERIALS AND TOOLS*

Materials:
- 9 ½ inches clay cane of your choice
- (1) 2oz pack of clay in a coordinating color
- A small glass dish of your choice

Tools:
- Pasta Machine
- Acrylic Roller
- Tissue Blade
- Texture Sheet
- A glass surface or tile work surface
- Wax paper or copy paper
Instructions for Ring Dish

Choose your favorite polymer clay cane (a minimum of 9 ½ inches in length) and one (1) 2oz pack of clay in a coordinating color.

For this tutorial, I am using a polymer clay cane of my choice, and one (1) pack of Sculpey Premo Purple.

* Clay Veneer for “Jewelry Dish” *
Take your 9 ½ inch clay cane and cut approximately (30) 7/8 by 7/8 inch thin squares. Placing them side by side in a 6 in. by 6 in. square onto your work surface (glass or tile) with the plain sheet of copy paper or wax paper on top.

Then, take your acrylic roller, roll over the squares covered with the sheet of paper until it is one solid sheet, and smooth with no lumps or air bubbles.

After you have rolled the clay squares into one clay sheet, slowly lift the plain copy paper or wax paper. Also, gently lift the clay sheet from the work surface. Set it aside and get ready for the next step.

Next, get the package of clay, texture sheet, and acrylic roller for this step.
Open, cut, and condition one pack of clay (you can do this step at the beginning, while you are preparing your materials for your project). Put it through the pasta machine at least 20 to 30 times.

Lay the texture sheet on top of the clay sheet (I find it easier to roll the design onto the clay sheet in this manner). Take the acrylic roller and roll it over the texture sheet. Complete this process over the entire sheet. Be sure to use the wax paper in this process.
Place the polymer clay veneer on the non-textured side of the polymer clay sheet. Gently roll over the sheet to make sure that the veneer sticks to the clay without disturbing the texture on the other side of the sheet. Once you complete this step, get the small dish of your choice for the next step.

Take the clay veneer sheet and place it on top of the small dish. Gently press the clay sheet onto the dish. Make sure that there aren’t any air bubbles between the clay sheet and the dish. Once you make sure the clay sheet is completely adhered to the dish, get your tissue blade for the next step.
Now, take your tissue blade and cut around the dish to remove the excess clay from around the dish.

After you are satisfied with the way the clay sheet looks on the dish, put it in the oven at the recommended temperature on the clay package for an hour. Then, take the ring dish out of the oven, and let it cool down completely.
You can remove the clay ring dish from the bowl. Then, take your craft knife and cleanup the edges of the ring dish. This is to make sure that there aren’t any sharp edges around the entire ring dish.

You can use this beautiful dish for rings, other small pieces of jewelry, or little trinkets.

Enjoy your beautiful new piece of art.
