PVD COLOUR & FINISHES

Sambonet offers a choice of refined finishes on all its flatware collection. The customisation is obtained by a series of industrial processes & techniques applied to the surface. The workmanship of the technicians is of the highest quality, involving high pressure sandblasting, surface scraping & vaporisation.

PVD

(Physical Vapour Deposition) is a treatment which colours and shades valuable objects by evaporating metal particles in a vacuum chamber. This special treatment is welded to the surface of the stainless steel flatware, hardening the steel and optimizing its resistance to both rubbing and corrosion, as well as preventing rust & oxides from forming.

Satin finish

ANTIQUE

The unique 'Antique' finishing is characterized by the pleasant to touch texture & the original matt appearance of the stainless steel. This finish is the result of a high pressure ceramics sandblasting treatment, by means of micro ceramic particles, which defines the final effect.

VINTAGE

The captivating 'Vintage' look uses a special craftsman finishing technique on the surface of the stainless steel flatware. Through a series of industrial scraping processes, surfaces assume an original & intentionally "worn out" effect, introducing a new & fascinating ambiance at the table.

SATIN

The 'Satin' finish is achieved in a similar way as the 'Antique' process but has a smoother matt look.
