

Measuring Tips & Tricks

STEP 1 ——— ● STEP 2 ——— ● STEP 3 ——— ○

It is important to make sure that your piece will fit in all entryways to ensure a successful delivery.

STEP 1

Note Key Dimensions for Your Piece

You can find detailed dimensions, including the three most important—Width, Depth and Height—on each sofa's product page.

Extra Tip:

Sectionals are delivered in individual pieces. Use individual component measurements in the 'Full Dimensions' link as opposed to the sectional's overall measurements.

STEP 2

Measure Your Home

1. Measure the height (A) and width (B) of all doors and hallways.
2. For narrow entryways and corners, also measure the total clearance length (C) between the outside and interior walls.
3. Determine the best pathway from outside your home to where the piece will live.

Extra Tip:

Account for fixtures, decorative moldings, interior walls, stairwells, and elevators when measuring, as they may pose an obstacle when delivering to a building or once the piece is in your home.

Measuring Tips & Tricks

STEP 1 ——— ● STEP 2 ——— ● STEP 3 ——— ●

It is important to make sure that your piece will fit in all entryways to ensure a successful delivery.

STEP 3

Determine If Your Piece Will Fit Into Your Home

1. The width of the entryway (B) must exceed the piece's depth (D) OR height (H).

Note: The height on all Maiden Home sofas can be reduced by removal of attached legs or bases. Subtract leg height from overall sofa height to determine the lowest possible height on your sofa.

2. If the entryway clearance (C) exceeds the piece's width (W), then you can move it in horizontally.

3. If the entryway clearance is less than the piece's width, then it will be brought in vertically, meaning the entryway height (A) must exceed the piece's width (W).

Take Note: the piece will not fit into your home if either of these hold true:

1. The piece's width exceeds both the entryway clearance AND entryway height.
2. If the entryway width is less than the piece's depth and height, even with legs or base removed.

WE'RE HERE FOR YOU

Our White Glove Delivery Partners are experts when it comes to maneuvering pieces inside of your home. They will help to identify which is the best path inside and, if necessary, remove legs or bases to ensure a successful delivery. However, please be sure to properly measure the entirety of your delivery path before placing your order, as we cannot accept returns on pieces that we are unable to deliver due to fit issues.
