Bill Kolovani has experienced many ups and downs in an incredibly varied and exciting life. A life that includes being at the top financially and living in a lavish penthouse after growing up in a back alley in small-town rural Pennsylvania, as well as bankruptcy, and personal loss. He explains how his courage, belief in himself, and faith in God helped him through such tumultuous times to emerge alive, whole, and living a successful life.

### **Summary**

If you had the chance to go back in your life and make your wrongs right, would you do it? Of course you would!

Most people would jump at the opportunity to correct things in their life. Bill was playing a casual game of golf—one of his favorite pastimes—but after a duffed tee shot, he searches for his lost golf ball and finds something entirely different. A fall nearly sends him to his death and into a dream realm allowing him to reconnect with this past.

While unconscious, Bill is able to go back to key individuals and situations in his varied life. From one chapter to the next you'll hear the intrigue of the story, the trouble he finds himself in, and how he comes out on the other side of mishap to eventually "say what he meant to say." ### Summary

"This common denominator of success is so big, so powerful, and so vitally important to your future and mine that I'm not going to make a speech about it. I'm just going to 'lay it on the line' in words of one syllable, so simple that everyone can understand them."

"The common denominator of success the secret of success of every person who has ever been successful lies in the fact that he or she formed the habit of doing things that failures don't like to do."

"It's just as true as it sounds and it's just as simple as it seems. You can hold it up to the light, you can put it to the acid test, and you can kick it around until it's worn out, but when you are all through with it, it will still be the common denominator of success, whether you like it or not."
