

## Classic 3

The Classic 3 brings the acclaimed sound of Dan D'Agostino Master Audio Systems amplifiers to home theaters and advanced 2.1-channel stereo systems. Borrowing heavily from the amplification circuits D'Agostino developed for the Momentum amplifiers, the three-channel Classic 3 is a perfect companion to the Classic 2 when outfitting a 5 or 7 channel configuration of main speakers in a high performance home theater system. Voiced in parallel with its bigger brothers, the Classic 3 also mates beautifully with Momentum and Progression Series amplifiers in a reference level home theater. Conversely, it can form the power base for the front Left, Center, Right array in a more modest configuration.

The Classic 3 features the same elegant faceplate and rugged enclosure as the Classic 2. It is the simplest, most affordable way to get true D'Agostino quality: essential sound, with delicacy and dynamics that will please the world's most sophisticated music and home theater aficionados. Simplicity paired with. pure performance.

Like all Dan D'Agostino Master Series models, the Classic 3 is built by hand in our Arizona factory.
