

## METRONOME TECHNOLOGIE CONFIRMS THEIR INVOLVEMENT IN STREAMING WITH THEIR NEWEST *DIGITAL SHARING* STREAMER

The first step of Métronome in the streaming world had been taken at the end of 2017 with the launching of the DIGITAL SHARING range. The DS<sup>S</sup>, for DIGITAL SHARING Streamer, is the second product of this product line, and some say that it's not the last one...

DS<sup>S</sup> is the first streaming transport at Métronome, logically positioned in the DIGITAL SHARING product range, after DS<sup>C1</sup> which is a connected D/A converter. Métronome designer Clauzel decided to keep the piano design of the DS range and reduce the size of the housing in order to be easy to insert in any system (25x25x7cm = 9.8x9.8x2.8 in). The blue touch and logo on the front plate are a reminder wink to the famous blue leds which have been lightening for years all the CD players of the brand. Perfectly plug-and-play, DS<sup>S</sup> will accept all files formats in PCM up to 384 kHz and DSD64, streamed through ethernet or Wi-Fi, and is MQA compatible.

DS<sup>S</sup> is UPnP and DLNA certified, usable with all player Apps under those protocols ; the advised App being mConnect Control. It is also ROON compatible and Airplay 1 and Airplay 2 certified.

Retail price = 3,490.00 €

*(Available in silver and black finishes)*

**Jean Marie Clauzel, Owner and Designer, emphasizes that : “In May 2019, during our biennial Distributor’s Convention in our facilities, I asked to our partners what product they were missing in our Métronome range. Almost 90% of them wanted by far a streamer transport as their first priorities... so we did it, and I’m sure we did it well ! The most important in that case was to make a robust and easy product, while maintaining the sound quality level of our production.”**

## MAIN TECHNICAL SPECIFICATIONS OF DS<sup>S</sup>

### Network :

1 RJ45 Ethernet  
2 USB sockets

### Digital outputs:

Signals accepted PCM  
44.1 to 384 kHz and DSD64  
1 x S/PDIF RCA connector  
1 x AES/EBU XLR connector  
1 x Optical Toslink connector

1 x HDMI (I<sup>2</sup>S)

### Power supply :

1 toroidal transformer with independent regulation lines

### Voltage:

100 VAC - 50/60 Hz Japan  
120/240 VAC - 50/60 Hz Other countries

### Other characteristics :

Consumption : 35 VA  
Dimensions (LxHxP) : 250 x 250 x 70 mm Weight : 4.8 kg

**About Metronome Technologie: Over 30 years of innovation in sound reproduction.**

Métronome is a French high-end audio manufacturer. Our aim is to offer audio enthusiasts a universe where the sound is king, where it is real. Designed and hand-made in France, our products will satisfy most discerning music lovers with incredible technical performances and quality of sound, approved by international reviewers.
