

## To make this Christmas wreath:

1. Print labels out onto adhesive label paper. Use Avery Template 22817 OR print onto full sheet label paper and use a 2" hole punch to cut out circles.
2. Adhere decorative labels to canning lids. In our example, we used 8 green labels and 8 red labels. You can use more lids to make a larger wreath.
3. Arrange green canning lids for the wreath base. To maintain a circular wreath shape, evenly space the green lids around a dinner plate, leaving space between each lid.
4. Place a red lid between each green lid. Apply craft or hot glue to the back of each red lid where it will overlap the green lid. Allow glue to dry.
5. Loop a ribbon or bow through the top of the wreath to hang. OR add heavy duty magnets to the backside to hang onto a metal door or fridge. For extra decoration, apply glitter glue around the lids.

## Bonus Holiday Idea:

Apply printable labels onto lids, then insert into canning rings. String a bow through the lid and use as an ornament.
