

**THANK YOU** for choosing **Boulder Tools!** We pride ourselves on making quality products and providing world-class customer service. We're excited to show you why we are considered among the best in off-road tools & accessories.

Many hours were invested into the research and design of your tire deflator kit to ensure it meets our top standards and reputation of High-quality, Heavy-duty tools. If this deflator does not meet your expectations in any way PLEASE CONTACT US DIRECTLY at **Support@BoulderTools.com**. We strive for perfection, but mistakes happen, so be sure to double check your order and let us know if something doesn't seem right.

### **WILL YOU TAKE 30 SECONDS & LEAVE A PRODUCT REVIEW?**

The many fraudulent sellers and products on Amazon today make product reviews more important than ever. As a company dedicated to quality products and excellent customer support, we need your help.

Will you take 30 seconds and leave a product review on amazon? You can quickly leave a review using the button found on your order detail page on amazon.com THANK YOU!

## **REGISTER & BECOME A VIP**

Register your product purchase at **www.BoulderTools.com/warranty** to receive your no-hassles warranty. You will also become a **VIP Member** of the Boulder Tools family. **VIP Members receive HUGE discount codes to use on Amazon anytime we launch a new product.** It's well worth the 1 minute you will spend registering your deflator purchase.

### **PRO TIP!:** KEEP MAKING ADJUSTMENTS

IT TAKES A FEW ADJUSTMENTS TO GET THE DEFLATORS SET WHERE YOU WANT THEM. TAKE THE TIME TO SET THE DEFLATORS PROPERLY. THEN, EACH TIME YOU USE THEM ON THE TRAIL, MAKE SMALL ADJUSTMENTS AS NEEDED UNTIL YOU GET IT SET JUST HOW YOU LIKE IT. IT'S WORTH THE EXTRA TIME BECAUSE A PROPERLY ADJUSTED SET OF DEFLATORS WILL MAKE HITTING THE DUNES OR TRAILS QUICK AND EASY DOWN THE ROAD.

# Pro Tire Deflator Instructions

## HOW TO SET TIRE DEFLATORS TO A SPECIFIC PSI

1. Deflate a tire to your ultimate desired pressure - to set the deflators to a specific psi you need one tire that is already deflated to that psi.
2. Turn both the Lock Ring and the Adjustment Cap clockwise until tight.
3. Screw Deflator Body on to the tire valve stem until tight.
4. Turn the Adjustment Cap counterclockwise until you hear air beginning to escape.
5. Immediately tighten the Adjustment Cap slightly clockwise just until air flow stops.
6. Turn the lock ring counterclockwise and tighten it against the adjustment cap being careful not to turn the adjustment cap during the process.

## HOW TO USE THE TIRE DEFLATORS

1. With all four Tire Deflators now preset to your desired ultimate pressure, you can deflate your tires quickly and easily by screwing each of the Deflators on to your tire valve stems.
2. If your starting tire pressure is within 8 psi of the preset Tire Deflator setting, a manual start may be required by pulling the Deflator Pin once installed on the valve stem.
3. Remove the Tire Deflators once tires are deflated.
