

Model Number	FC75GSWI
Description	Glem 75cm 5 burner Gas Cooktop

Manufactured by Glem Gas in the Modena factory. The design of the cast iron trivets to the full width of the cooktop maximizes the cooking area. This cooktop caters for cooks who want the flexibility offered by 5 burners but who don't have the space for a wider cooktop.

On the left hand side there is a dual control wok burner which allows for a simmer rate from 1 Mj/h right up to 16 Mj/h. On the right hand we have designed the layout so that the large burner can be operated even while cooking with a wok.

This is all in a 75 cm wide cooktop that still fits into the standard 60cm cut out.
