**REPORT OF ANALYSIS**

For: (34261) RAW ORGANIC WHEY  
Raw Organic Whey Protein Powder

**Detailed Method Description(s)****Full Antibiotic**

Sample analysis follows MWL LCMS 011 which is based on FDA LIB 4438. Submitted samples for antibiotics measurement are extracted with trichloroacetic acid and EDTA solutions, reagent water, and methanol. The extracts are cleaned and concentrated using solid phase extraction (SPE). The extracts are injected into a LC/MS/MS for separation and quantification.

**Streptomycin antibiotic residue**

Samples are analyzed following MWL LCMS 013 which is based on FDA LIB 4438 (modified). Samples are extracted with solvents including trichloroacetic acid, water, EDTA, and methanol and passed through solid phase extraction (SPE) columns. The extracts are analyzed by LC/MS/MS quantitating precursor ion 582.25 and product ions including 263.05, 176.10, and 407.10.

The result(s) issued on this report only reflect the analysis of the sample(s) submitted.
