

### HOW TO CHECK YOUR MILEAGE

The best way to determine how well the DURAMILEAGE tuning is doing for you is to measure the amount of miles you get out of a tank of fuel running stock verses DURAMILEAGE tuned. Do you drive your truck the exact same route, driving the exact same speed, with the exact same outside humidity and air temperature? Probably not. If you take in to account idling time and city driving you might not see as much calculated mpg as you will calculating how many miles driven per tank.. **We do NOT recommend using only the DIC as fuel flow changes can affect the digital read-out.**

### TESTIMONIES

I always like to hear back from customers on how well the DURAMILEAGE is doing for them. **Please email me your testimony so that I can post it on our website. (I will only use your first name): [testimony@powerupdiesel.com](mailto:testimony@powerupdiesel.com)**
