

## ALPHAGATOR STENCIL

### Step-by-Step Installation Instructions

#### **ALPHAGATOR – Both upper and lower case instructions.**

Stencil consists of one long paper panel per lettering set.

#### *Step-By-Step Installation Instructions:*

*Installation can be completed by one person, and takes approximately 3 hours to complete.*

- 1) If installing both AlphaGators, locate a surface area which is approximately 6 feet wide by 25 feet long. For a single AlphaGator, a 3 foot by 25 foot area is needed.
- 2) Sweep and/or clean the installation area to ensure it is free of dirt and/or pebbles.
- 3) Unfold the stencil panel, and lay out on the surface. NOTE: For the upper case letters, the tail is on the right side, and for the lower case letters, the tail is on the left. Tape down the stencil edges to hold in place.
- 4) Spray paint all the holes and remove paper stencil.
- 5) Using a piece of chalk, connect the dots in order to clearly see the shape of the gator as well as the letters which may be stenciled onto the paper panels. This step will be helpful when painting the stencil.
- 6) Paint the largest surface (as shown in green) of the AlphaGator first, and then paint the letters in various colors. *Recommended: If installing both the upper and lower case AlphaGators, and if alternating colors of letters, it is educational to paint the upper and lower case of the same letters in the same color.*
- 7) HAVE FUN!
