⚠ WARNING!

If you do not understand these directions, or if you have any doubts about the safety of the installation, please call a qualified technician. Check carefully to make sure there are no missing or defective parts. Improper installation may cause damage or serious injury. Do not use this product for any purpose that is not explicitly specified in this manual. Do not exceed weight capacity. We cannot be liable for damage or injury caused by improper mounting, incorrect assembly or inappropriate use.

⚠ WARNING: CHOKING HAZARD

SMALL PARTS - NOT FOR CHILDREN UNDER 3 YEARS. ADULT SUPERVISION IS REQUIRED.

PACKAGE CONTENTS

A (x1)
Outer
Stabilizer Bar

B (x1)
Inner Stabilizer
Bar

C (x2)
M6x12

D (x2)
M6 Lock Nut

E (x1)
Allen
Wrench

TOOLS NEEDED

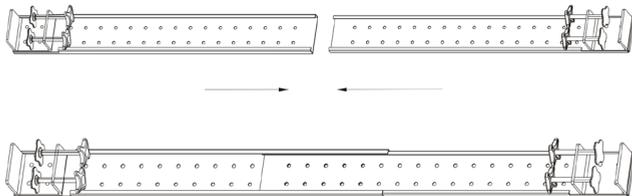

Phillips
Screwdriver

ASSEMBLY STEPS

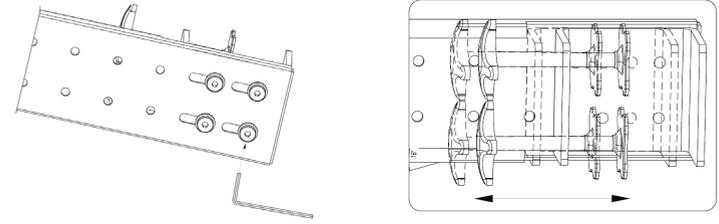

STEP 1

Insert the Inner Stabilizer Bar (**B**) into the Outer Stabilizer Bar (**A**).

STEP 2

Slightly loosen the 8 bolts for the end clamps using the Allen Wrench (**E**) so the clamps may slide from side to side as shown.

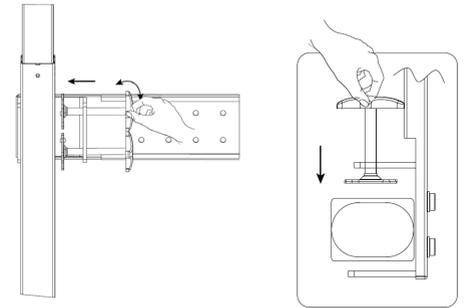

STEP 3

Secure the clamps to the desk legs, making sure not to over-tighten the clamps, then align the holes of the two stabilizer bars.

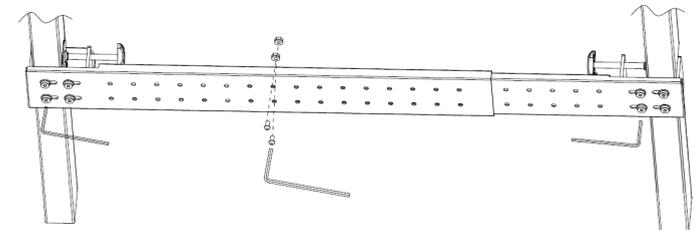

NOTE: If mounting to a height adjustable desk with the outer layer of the legs on the bottom, attach the stabilizer bar as high as possible to the outer legs. If the outer layer of the legs is on top, attach the stabilizer bar near the bottom of the outer legs.

CAUTION!
Over-tightening the clamps may restrict movement of a height adjustable desk, placing excess strain on the mechanism.

STEP 4

Insert the M6x12 Bolts (**C**) into 2 of the holes of the outer and inner stabilizer bars, and secure using the M6 Lock Nuts (**D**). Tighten all bolts using the Allen Wrench (**E**).
