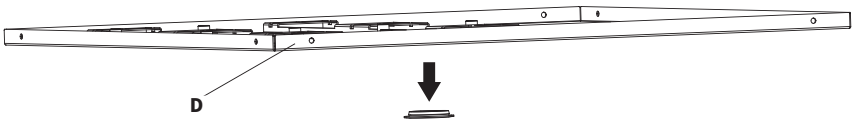
ASSEMBLY STEPS

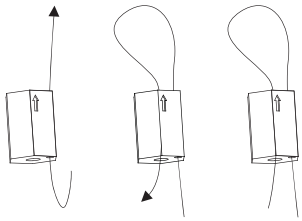
STEP 1

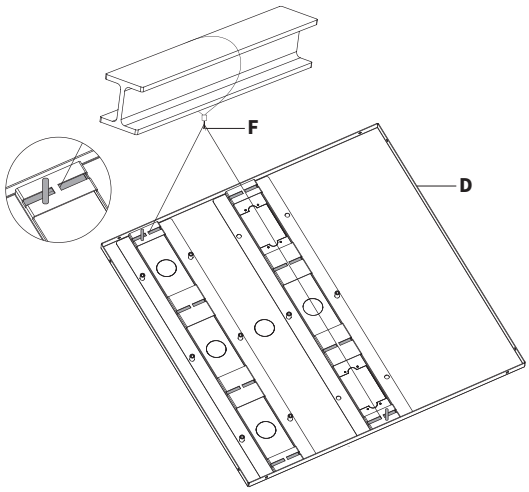
Remove plastic plug from Ceiling Plate (**D**).



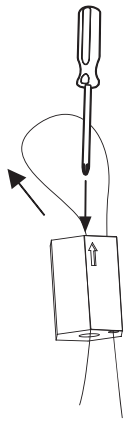
STEP 2

Insert 2 toggles at end of Y-Cable with Lock (**F**) into 2 of the 16 slots on the top of the Ceiling Plate **(D)**, making sure the slots chosen will provide optimal support for the mount with projector. Place Ceiling Plate into suspended-ceiling grid. Thread end of cable through the side hole in the lock in the direction of the arrow, wrap cable around beam or other support, then insert cable down through center hole in lock and pull down to secure.



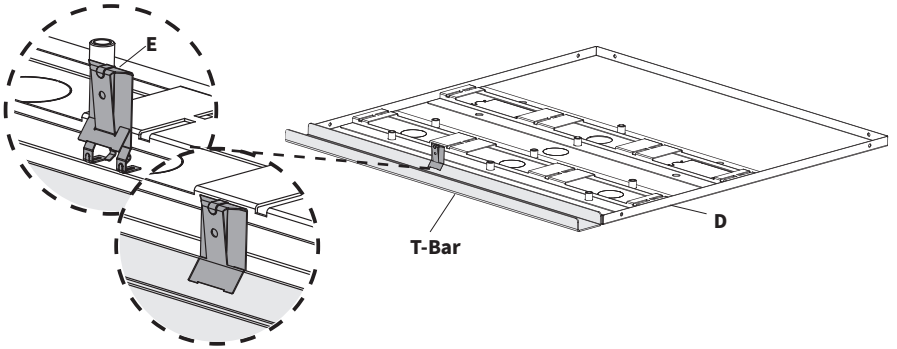


NOTE: To disengage the lock, use a small screwdriver to press in the centralized spring-loaded barrel on the side the arrow is pointing towards. Pull the cable out while holding down the spring.



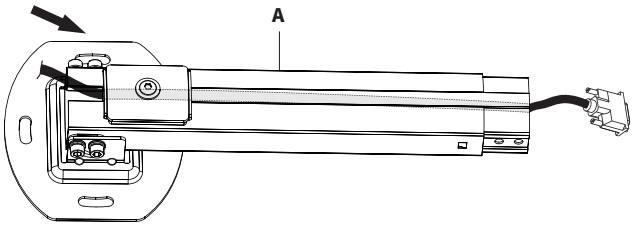
STEP 3

Push Clips (**E**) down over drop ceiling T-bar to hold the Ceiling Plate **(D)** down.

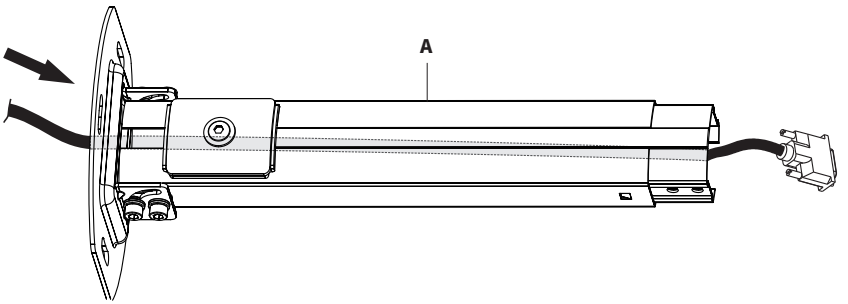


STEP 4

OPTION A: Insert cables through side of Mount (**A**) if cables will be exposed below ceiling.

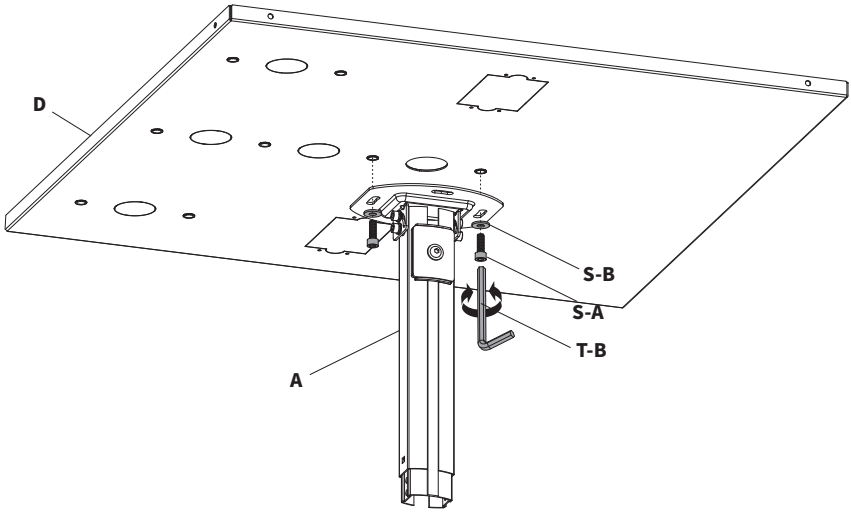


OPTION B: Insert cables through center of Mount (**A**) if cables will be hidden above ceiling.



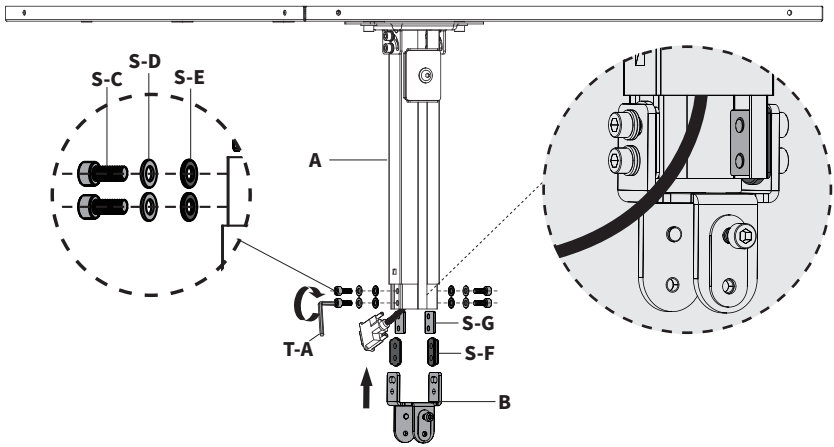
STEP 5

Secure Mount **(A)** to Ceiling Plate **(D)** using M6x18mm Bolts (**S-A**) with M6 Washers (**S-B**), and tighten with 5mm Allen Wrench (**T-B**).



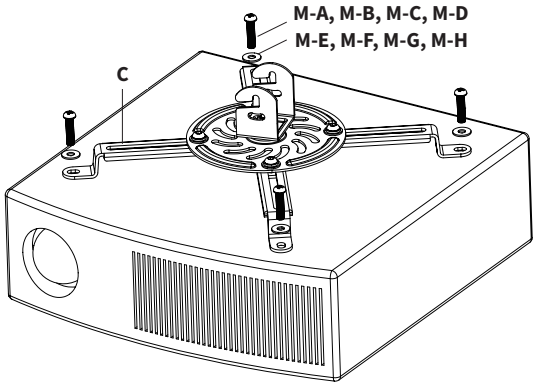
STEP 6

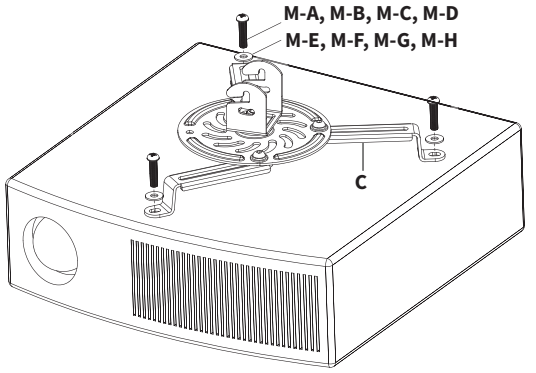
Secure Bracket **(B)** to Mount **(A)** using Threaded Plate **(S-G)**, Plastic Spacer **(S-F)**, M5x12mm Screws **(S-C)**, Small M5 Washer **(S-D)**, Plastic M5 Washer **(S-E)**, and 4mm Allen Wrench **(T-A)**.

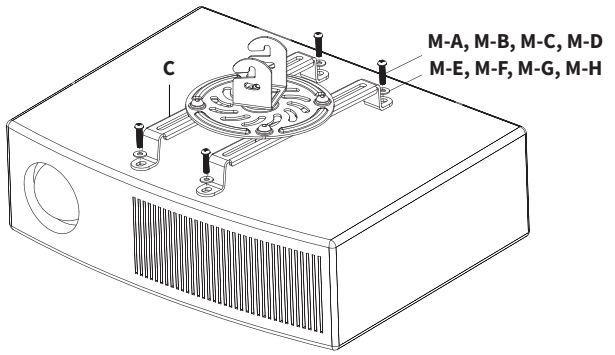


STEP 7

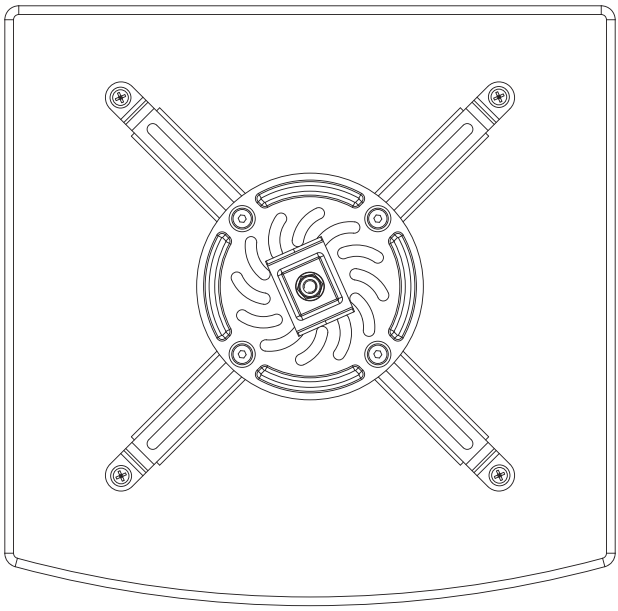
Align arms on Mounting Arms **(C)** with mounting holes in projector, and secure to projector using Screws **(M-A through M-D)** and Washers **(M-E through M-H)** most appropriate for your projector. If your projector has 3 mounting holes, simply remove one of the arms.

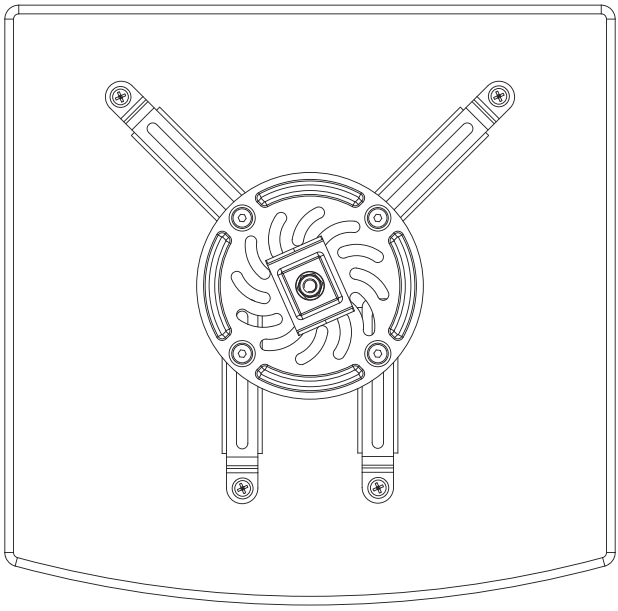






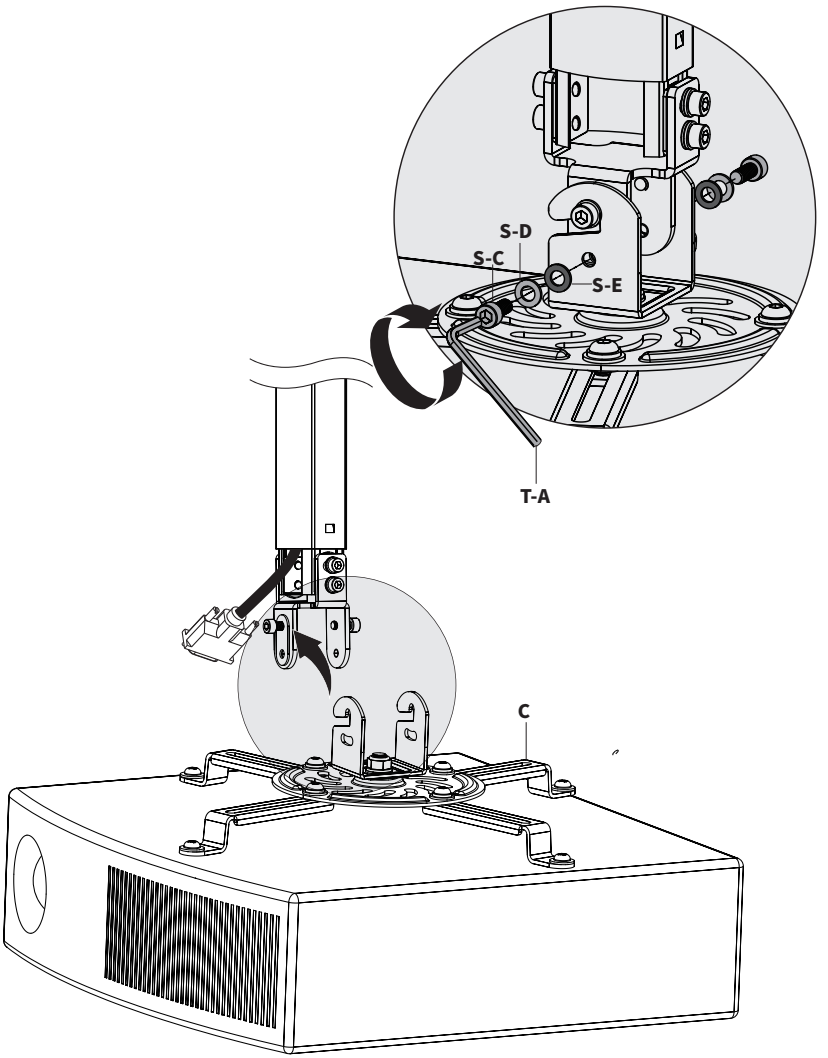
STEP 7 Cont.





STEP 8

Angle Mount Arms **(C)** with Projector and hook onto Assembled Mount to partially secure.
Secure Mount Arms **(C)** to Assembled Mount using M5 Plastic Washer **(S-E)**, M5 Washer **(S-D)**, M5x12mm Screw **(S-C)** and 4mm Allen Wrench **(T-A)**.



STEP 9

Adjust angle and rotation of projector if desired by loosening screws on Assembled Mount using 4mm Allen Wrench **(T-A)**.

Adjustment #1: Use for pitched ceiling applications ONLY.
Adjustment #2 & #3: Adjust tilt angle using one or both of these adjustments.
