## PRODUCT STRUCTURE

## TOOLS NEEDED

## ASSEMBLY STEPS

**STEP 1** Choose a suitable location to mount. The screen must be installed at least 7ft (213.5cm) off the ground to allow for full extension.

**STEP 2** Measure distance between two rings on the housing. Mark locations on wall to place screws and ensure locations are level and equal in height. Insert screws into wall.

**NOTE:** Mounting screws not included

**STEP 3** Carefully hang housing onto screws, using attached rings.

## SCREEN ADJUSTMENT

### PULL DOWN

To extend the screen, use steady pressure to pull down. The screen will lock automatically when you stop pulling.

### RETRACT

To retract the screen, give a gentle tug which will release automatic lock. Hold pulling ring to prevent screen from moving too quickly.

**NOTE:** While retracting, make sure screen rolls evenly on both sides

## CLEANING

If screen becomes dirty, wipe gently with a soft, damp cloth. A light cleanser (such as hand soap) or detergent may be used for difficult spots. Do NOT use bleach or solvents to clean screen material.
