

# How to Install Decorative Wood Panels

The installation of the decorative wood panels is easy with suitable adhesives and preparation.

## Tools and Equipment:

- Fast-setting acrylic assembly adhesive.
- Fireproof mounting glue in saunas and on building frames.

## Wall preparation:

- Make sure the wall is clean, dry and free of any debris or unevenness.

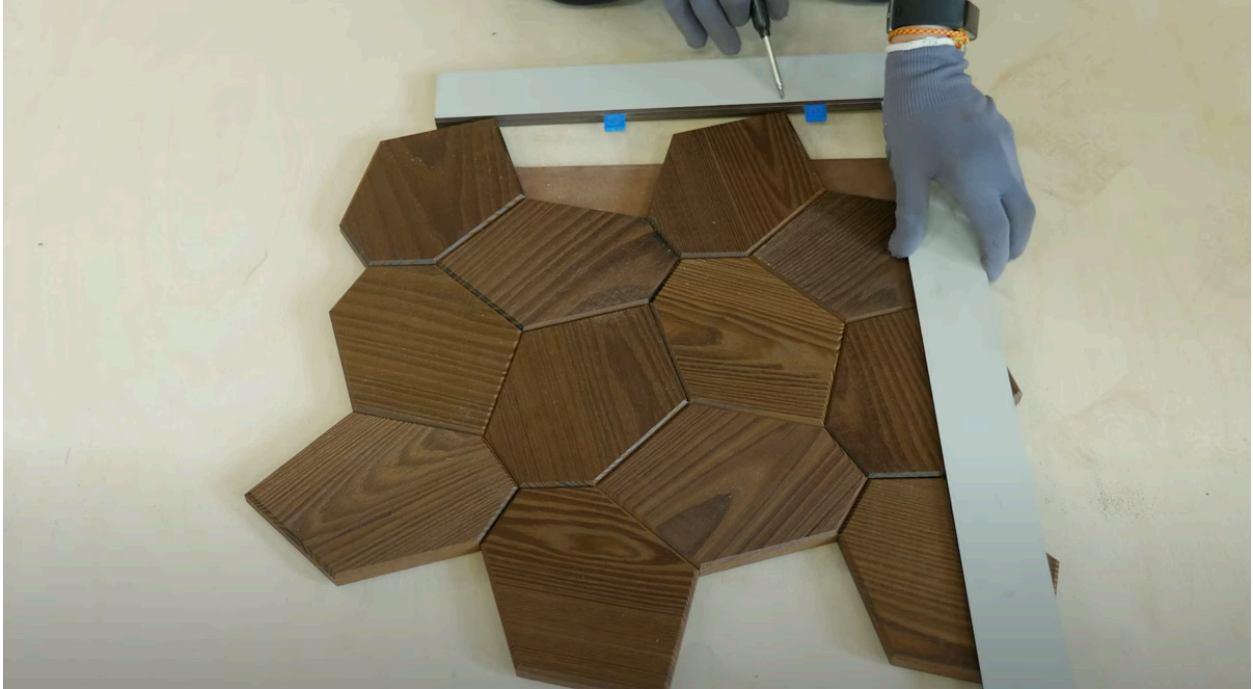

## Square shaped panel installation:

- Apply the adhesive to all four corners and to the center at the back of the panel.
- Make sure the base is flat.
- The distance between the panels must be 3 mm.

### Dissimilar shaped panel installation:

- Panels with patterns should be installed with the first line of the plates on a straight cutting surface both vertically and horizontally.
