

KIVI-IKI

Chimney connection height from the bottom of the stove:

ATTN! When using the “IKI protective base” the height of the connection point rises 70 mm accordingly.

If the stove is connected to the IKI T600 Chimney there will be a 300 mm high adapter mesh between stove and the chimney.

IKI wood-burning stove can be installed into a) a brick flue b) ceramic flue or c) an air-ventilated flue. With any other type of flue, please contact the manufacturer to discuss compatibility.
