

Hauser **ENVIROWOOD**

Envirowood is an ecologically oriented product made from 100% recycled post-consumer & post-industrial plastics. Possessing outstanding outdoor performance characteristics, Envirowood offers maximum durability, and minimal maintenance.

Why use Envirowood on Hauser Site Furniture?

- **Eco-Friendly**

Made of 100% recycled post-consumer & post-industrial plastics, Envirowood plastic lumber is an ecologically friendly choice for site furniture use.

- **UV Stability**

Envirowood lumber uses UV stabilized colouring that is consistent throughout the product, so it will not fade in the field.

- **Longevity & Durability = Sustainability**

The longer the lifetime of a product, the lower the environmental impact will be. Envirowood lumber products are very durable, standing up to the rigors of public wear and will not crack, split, rot, or splinter.

- **Maintenance**

Envirowood lumber is virtually maintenance free! It does not need to be painted or restained. Envirowood is very stain resistant and can be cleaned with a mild detergent & water.
