

Hauser HPL

Hauser HPL offers the freedom to choose a finish that best fits your project needs.

HPL

Hauser HPL

Hauser HPL (High-Pressure Laminate) is produced in a thermosetting press under very high temperature and pressure. This process creates a thin, yet durable panel that can be used in an endless number of outdoor furniture applications. Hauser HPL enhances the look, performance and longevity of any project. These exterior grade panels are extremely robust, with excellent protection against weather, UV radiation, impact and scratching; all while exceeding North American fire requirements. This durability and resilience makes Hauser HPL the ideal option for any exterior environment.

Choose between a variety of standard HPL finishes to complement your design intent. Hauser makes it easy for you to leave a unique signature on every project.
