

HOME COLOR ROOT TOUCH UP INSTRUCTIONS

The use of this color kit could produce an allergic reaction for some users. Spilling the contents of this color kit could cause injury to eyes, skin or other body parts or damage furniture and personal property with contact. The user assumes all risks associated with the use of this color kit without a professional hairstylist. LaBelle Day Spas & Salons shall have no liability for any loss, damage or injury to the user. Please use your color within one week of receipt and store it in a dark cabinet away from any sun so it doesn't oxidize before use.

1. PREPARE TO COLOR

Begin with dry, unwashed hair, wrap a towel around your shoulders and put gloves on to protect your clothes and hands from the hair color. Apply the protective cream on the skin along your hairline.

2. MIX THE COLOR

Mix both the color and developer inside the bowl with the brush for 1 minute. Once the developer and color are mixed, you must use the mixed color immediately as it will be bad within an hour.

3. APPLY TO ROOTS

Apply the color to your roots with the brush and fully saturate your hairline and temples. Apply by sectioning hair starting at one end of the hairline and slowing working your way to the other end, in parts, for more precise coverage.

4. WAIT 40 MINUTES

Leave the hair color on for 40 minutes. If your hair is also fading, apply the color throughout the hair in the last 15 minutes only.

5. RINSE & CONDITION

Rinse, shampoo and condition your hair until the water runs clear. Apply a nourishing after color conditioner on for 2 minutes then rinse thoroughly. Towel-dry and style your hair.
