

NEW v4.0
Many new features!

BACnet OPC Server

- Integrate BACnet data and alarms into SCADA workstations
- BACnet Client and OPC Server
- Robust / mature BACnet code (BACstac™)
- **NEW** - Status indicators for every Object
- **NEW** - Easy BACnet auto-discovery
- **NEW** - Easy “one button” program load
- Automatic polling features

PRODUCT INFORMATION

By adding this software to your OPC compliant workstation, you can read and write BACnet properties, as well as monitor for alarms, events or Change-of-Value notifications.

An easy to use interface allows self configuration and features a robust implementation of BACnet auto discovery services.

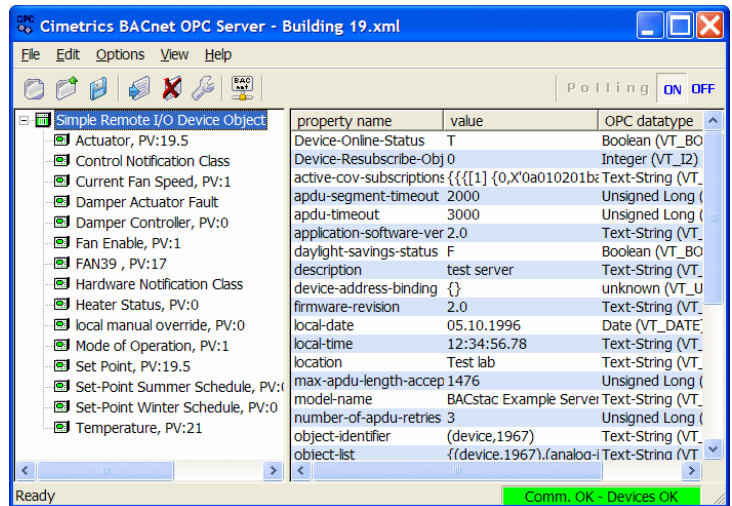

Values and properties can be configured, modified, and saved before having access to the workstation or any other part of the system.

OPC VERIFICATION WORKSTATIONS

Iconics—Genesis32 Wonderware—Intouch
 Intellution—iFIX
