

## Light-Up Instructions

This is what your jacket or chaps look like open with the light casing showing. Located on the inside you will find an opening that allows you to access the pockets that hold the lights. Located on the light casings you will find the ON/OFF switch.

\*\*\***Caution**—do not pull hard on the light casing. The lights may pull out. Do not bend the copper wire in half—the wire can break if bent repeatedly. \*\*\*

\*\*\***DO NOT** submerge lights in water. Spot wash or remove lights for hand washing\*\*\*

Lights can also be removed for washing, although we recommend just spot washing because re-installing the lights can be a little tricky!

Thanks for buying Made in USA, and thanks for buying J. Valentine!
