Zuperior S - A combination profile of 6'-12'-26'. Used to increase acceleration, manoeuvrability, speed, and balance. It delivers fantastic ice contact needed for producing great edge control. It is a great choice for a power forward because of the added stability you need to battle along the walls and corners, but also acceleration bursts to escape from those areas. Size of holders 246- 254-263. For lighter skaters.

Zuperior M - Profile of 6'-13'-26'. See Zuperior S. Size of holders 272-280-288. For medium weight skaters.

Zuperior L - Profile of 6'-14'-26'. See Zuperior S. Size of holders 296-306-312. For heavier skaters.

Zuperior V - Profile of 6'-17'-26'. See Zuperior S. Size of holders 296-306-312. For goalies or heavy recreational players looking for great stability.
