

HO Scale: Laser Cut Lumber Load Assembly Instructions

1. Wood Bunk Assembly

- A. Remove string and two dunnage boards from part sheet with a hobby knife.
- B. Spray glue on back of part sheet (side without scored lines). We recommend 3M Super 77 spray glue.
- C. With a sharp hobby knife carefully remove parts from part sheet. (tabs are on ends of 'boards')
- D. Begin stacking 'boards'.
 - i. Start bottom layer with glue side up.
 - ii. Keep sides & ends flush with each other.
 - iii. Save 'boards' with scored lines for outside layers.

2. Straps

- A. Glue one end of included 'banding' (we recommend CA glue) about 2 scale feet from the end onto the underside of assembled bunk. Allow glue to dry.
- B. Wrap 'banding' around bunk and glue other end of banding in place on the bottom of the bunk.
- C. Trim 'banding' if needed.
- D. Repeat steps a. thru c. on opposite end of bunk or as needed for longer bunks.

3. Dunnage

Use included dunnage as needed when stacking bunks on flat car.

Enjoy!
