# NEW POSITIONS

Getting down on all fours was never so much fun! The Doggie Style Strap™ allows couples to experience the same position with comfort, support and intensity.

## TIPS AND TECHNIQUES FOR BETTER USE

While you are on your hands and knees, your partner can wrap the Doggie Style Strap™ around your waist and hold the handles of the strap behind you. With the strap in place, your partner can pull you intensely close for extremely intimate contact. This also allows for very deep penetration and G-spot stimulation without having your “love handles” grabbed. The Doggie Style Strap™ relieves embarrassment and insecurity by giving the man something else to grab onto, other than his partner’s tender flesh.

## THE “WHEELBARROW”

You can play “wheelbarrow” by using the Doggie Style Strap™ to gently raise your partner off the ground. The thick, padded strap will not dig or cut into the wearer’s waist.

## LOCATION IS EVERYTHING

Try moving the location of the strap for different sensations. When placed low on the abdomen, the Doggie Style Strap™ puts pressure on the wearer and causes compression of the vaginal canal. This creates a tighter feeling for the man during intercourse and a more intense sensation for both partners.

This strap also gives the woman more control in the missionary position. When you wrap it around him, you can pull him closer for deep penetration and help control his thrusting.
