Fort Scott Munitions' (FSM®) 9MM Luger 80gr Nickel Plated (TUI™) ammo is a match grade handgun round, with a Tumble Upon Impact™ (TUI™) action that exceeds the performance of a standard expanding projectile for decisive terminal impact. Engineered to create a dynamic, Tumble Upon Impact™ (TUI™) wound cavity, the unique multi-patented design of our 9MM Luger pistol ammunition provides superior performance. If you carry a small caliber handgun, you know your life may depend on accurate shot placement.

Advanced Plating Technology

Ducta-bright 7a® Nickel is an advanced component nickel plating that has been optimized for the casings of these FSM® 9MM rounds. This plating provides nearly 5 times the ductility of traditional bright nickel systems. Ducta-Bright 7a® nickel is the only nickel system available today that has been engineered to withstand the bidirectional (sizing & crimping) as well as dynamic impact stress loadings (firing) that our ammunition components must endure.

Unfailing Accuracy

This fast, powerful round gives you superior accuracy and a tactical advantage in any situation. Fort Scott Munitions™ (FSM®) ammo provides impressive ballistic performance and ensures accuracy in a critical situation. When you need small caliber home defense ammunition that you can trust your life with, 9MM Luger (TUI™) ammo is a sure-fire solution. Fort Scott Munitions™ has raised the bar for 9MM Luger (TUI™) performance with this match grade self-defense ammo.

Potent and Powerful

Our 9MM Luger shells are the ideal choice when you need large caliber effectiveness from an easily concealable handgun. This precision ammo is perfect when you need to act fast and group your shots to target vital organs. The Tumble Upon Impact™ (TUI™) ensures more soft tissue trauma and hydrostatic shock than you would think possible from a small projectile. Representing the pinnacle of ballistic effectiveness, this handgun ammunition proves that lethal force from a small caliber projectile is not only possible, but something you can count on.
