

# Baron/Bonanza NLG Door Hinge Bushing Kit

**FAA and TCCA Approved**

## Overview

An essential part of your aircraft maintenance checklist is the need for periodic lubrication of hard to access door hinge bushings. Achieving proper lubrication is challenging because access is difficult. If these bushings are not lubricated regularly, corrosion will result. This could lead to an inoperable gear door or even damage to the aircraft structure.

Marsh Brothers Grease-Free Non-Metallic AeroTough™ bushings will eliminate any chance of corrosion and reduce wear rates, replacing traditional metal bushings. AeroTough™ GF is a self-lubricating polymer, so they will never require lubrication.

## Benefits

- ✓ Self-Lubricating. Never worry again about lubricating tough-to-access places
- ✓ Reduces maintenance down time
- ✓ Reduces maintenance costs
- ✓ Easy to install

**Marsh Brothers Aviation**, a Thomson-Gordon Group company with over 100 years of history, is a family-owned business that develops and manufactures high performance specialty bearings, seal and engineered mechanical components for the global aviation industry. These products are built using Marsh Brothers proprietary non-metallic polymer materials that are self-lubricating offering improved performance, increased life, significantly decreased weight and reduced maintenance and downtime and costs. Marsh Brothers is dedicated to designing and producing solutions that improve aircraft reliability and maintainability, while reducing its environmental impact..
