

# King Air NLG Door Hinge Kit

FAA, TCCA and EASA Approved

## Reduce Downtime with Grease-Free AeroTough™ Bushings

### Overview

An essential part of your aircraft maintenance checklist is the need for periodic lubrication of hard-to-get-at door hinge bushings. Achieving proper lubrication is challenging because access is difficult. If these bushings are not lubricated regularly, corrosion will result. This can cause the bushing and sleeve to fuse together over time, resulting in problems with the door rigging and the operation of the aircraft. This could lead to an inoperable gear door or the cracking of the gear – a safety issue for sure at best, an expensive repair. The Marsh Brothers kit is insurance against the possibility of future problems.

### Benefits

- ✓ Reduced Wear
- ✓ Improved Reliability
- ✓ Reduced Maintenance Costs
- ✓ Reduced Maintenance Downtime
