Clause No.: Q007
Effective: April 1, 2021
Page: 1 of 1

MATERIAL TEST RESULTS - CHEMICAL

All materials are to be supplied with actual chemical test reports for each batch/lot used to produce the material supplied.

The material test reports shall specify the material grade, specification and shall be dated and signed by the respective testing authority as evidence that the test certificate meets specifications for the material supplied. The supplied goods shall be traceable and identified to the test report(s) supplied.

The test report shall list the specifications, including revision numbers or letters, to which the material has been tested and/or inspected and the identification of the material lot to which it applies.

When the material specification requires quantitative limits the test report shall contain the actual test and/or inspection values obtained.
