SPECIAL FLOWER CARE NOTES FOR ITEMS SPECIFIC TO THIS PACKAGE:

- **Roses and Lisianthus:** Reflexing your roses and lisianthus is a baller florist move! Not only does it create visual interest, it makes your product larger, getting you more bang for your buck! I do this right before I pull the flower into a design.
- **Ranunculus:** Have 22 gauge straight floral wire on hand in case they are heavily curved and bending under their own weight. We have a Youtube video on how to do this!
- **Carnations:** Sometimes these guys can come in closed, but with carnations, you can easily use thumbs to push or 'mash' them open. They are extremely tough and hardy, and the only flower you can manhandle in that way.
- **Bug Nibbles:** Remember that you are working with unprocessed greenery, so you may find some leaves that have been munched. Just snip those away! Nibbles are typically found on seeded euc and salal predominately
